Cross-Curricular Approaches to Language Education Aug 27 2019 Current applied linguistic research generally supports the adoption of interdisciplinary approaches in education with the objective of enhancing learners' progress and teachers' practices. In this spirit, this edited volume explores the issue of cross-curricular learning and teaching from a wider perspective. The twenty-three papers collected here are categorised in four thematic units, all of which, however, share a common feature: they focus on interdisciplinary learning and promote the integration of knowledge and skills from various subject areas. As such, all the papers brought together in this volume, thus, emphasise the interconnectedness of knowledge and ideas in primary, secondary and tertiary education. The theme of Cross-Curricular Teaching and Learning is related in this volume to Intercultural Education, to Content and Language Integrated Learning, and to Information and Communication Technology (ICT). The book will be of interest to scholars who are interested in relevant research-based data and results, and to educators who wish to update their knowledge about cross-curricular teaching and improve their language teaching practices.
