STEM to Story Oct 20 2021 Bring STEM to life for students with zombies, rockets, celebrities, and more STEM to Story: Enthralling and Effective Lesson Plans for Grades 5-8 inspires learning through fun, engaging, and meaningful lesson plans that fuse hands-on discovery in science, technology, engineering, and math (STEM) with creative writing. The workshop activities within the book are the innovative result of a partnership between 826 National's proven creative writing model and Time Warner Cable's Connect a Million Minds, an initiative dedicated to connecting young people to the wonders of STEM through hands-on learning. Authentically aligned with both the Common Core State Standards and the Next Generation Science Standards, this book provides teachers, after-school and out-of-school providers, and parents with field-tested lessons, workshops, and projects designed by professionals in each field. Including reflective observations by arts and science celebrities like Jon Scieszka, Mayim Bialik, and Steve Hockensmith, lessons feature bonus activities, fun facts, and teaching points for instructors at every level. These quirky, exploratory lessons will effectively awaken student imaginations and passions for both STEM and creative writing, encourage identity with scientific endeavors, and make both science and writing fun. Grades five through eight is the critical period for engaging students in STEM, and this book is designed specifically to appeal to – and engage – this age group. The guided curricula fosters hands-on discovery, deep learning, and rich inquiry skills while feeling more like play than school, and has proven popular and effective with both students and teachers. Awaken student imagination and get them excited about STEM-Fuse creative writing with STEM using hands-on activities Make scientific principles relevant to students' lives Inspire students to explore STEM topics further The demand for STEM workers is closely linked to global competitiveness, and a successful future in STEM depends upon an early introduction to the scientific mindset. The challenge for teachers is to break through students' preconceptions of STEM fields as "hard" or "boring," to show them that STEM is everywhere, it's relevant, and it's loads of fun. For proven lesson plans with just a dash of weird, STEM to Story is a dynamic resource, adaptable and applicable in school, after school, and at home.

[Art Teacherin' 101](#) Jun 23 2019 Art Teacherin' 101 is a book for all elementary art teachers, new and seasoned, to learn all things art teacherin' from classroom management, to taming the kindergarten beast, landing that dream job, taking on a student-teacher, setting up an art room and beyond. It's author, Cassie Stephens, has been an elementary art teacher for over 22 years and shares all that she's learned as an art educator. Art teachers, home school parents and classroom teachers alike will find tried and true ways to make art and creating a magical experience for the young artists in their life.

The If Machine, 2nd edition Mar 01 2020 Fully updated edition with five brand new sessions and bonus features. Fully updated with new developments in the theory and practice of teaching philosophy, this new edition of the bestselling book, The If Machine, presents 30 clear, ready-to-use plans to teach philosophy in the classroom with children aged five to 13. Each tried-and-tested session offers an imaginary situation, followed by a series of questions to encourage children to challenge key philosophical ideas such as values and ethics, gender and identity, and existence and beauty. With a star system indicating the level of difficulty, this practical book by Peter Worley, founder of The Philosophy Foundation, outlines Peter's philosophical enquiry method, which he has developed over 20 years of teaching. This fantastic resource also includes a new hints and tips section, as well as a troubleshooting table with guidance and links to further resources about how to deal with common problems such as unanimity. Accompanied by a companion website featuring an introduction to the philosophy that inspired the ideas, The If Machine is a must-have resource for all classrooms.

[Beauty](#) Nov 28 2019 Grampa warned Luke to be careful with Beauty because she was an old horse, but Luke didn't listen.

[A Handshake from Heaven Lesson Plan](#) Dec 30 2019 A Handshake From Heaven Lesson Plan book contains lessons and activities successfully used across the country with both large and small groups of children in conjunction with the children's Eucharistic book A Handshake From Heaven. In this book, children are shown how the Eucharist is truly the Body of Christ and it is the means by which we as Catholics come to know Jesus...the best friend we will ever have. Teaching children about the Eucharist is one of the most rewarding tasks a catechist is called upon to do. Parents and teachers alike will find these lessons, taken as a whole or taken individually, successful and easy to implement. Lesson One will help children understand that being Catholic is a conscious choice we make in our journey of discovering Jesus. Lesson Two will aid in teaching about the importance of attending Mass on a regular basis. In the other lessons they will be shown how the altar is the table upon which is set the greatest gift of all...Christ's Body and Blood. Most important of all, these lessons will teach children that when they hold the Body of Christ in their hands, they are touching God. This is Jesus' gift to all who believe. The art work provided in the lesson plan book are taken directly from the artwork contained in A Handshake From Heaven and is intended to be used for the purposes of augmenting lessons; suggestions as to their use can be found in each lesson. Catechists are encouraged to use the illustrations that best fit the needs of their individual classes. I have tried to include alternate activities for many of the lessons; if you discover a modification you feel would be helpful to other catechists, please share that idea with others on my author page. We are in this together as we impart the beauty of the Eucharist to another generation of God's children. God bless each and every catechist and parent as they begin the wondrous job of sharing the Good News of the Eucharist with our youth.

Little Beauty Dec 22 2021 Featuring an important message about the value of friendship and the consequence of losing your temper.

[Adams Resume Almanac](#) Jan 29 2020 A revised edition of the most comprehensive resume guide on the market! A must for the successful job search, The Adams Resume Almanac, 2nd Edition contains everything a candidate needs to know in order to craft a compelling, job-winning resume. Milady Professional Educator May 15 2021 Milady Master Educator, Fourth Edition provides the backbone of the instructor theory for the beauty and wellness educator. The content presents educators with the teaching skills and educational judgments necessary to become an effective, engaging, and successful instructor. Master Educator is designed for flexibility, being used in programs ranging from a basic overview of instructor training to programs that require more advanced teaching techniques. Presented in a conversational, easy-to-understand style, it uses many pedagogical features to emphasize important information and powerful teaching techniques. Master Educator serves the future instructor as a valuable, fundamental learning tool, and the seasoned instructor with the strategies needed to adapt to the changing landscape of the learning environment. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The Elephant in the Classroom Aug 25 2019 So, the other day, I was talking with Ashley toward the end of class and mentioned she'd been absent a lot, so I asked if she had been ill. She said, "No. We've been getting the place ready for my parents. They're coming home." "Really?" I was a bit puzzled. "Yeah," she said, "I pick dad up from prison on Monday and mom on Wednesday." When a kid walks into class, he or she is carrying baggage. This is the reality. The most important thing for teachers to teach kids is that learning is fun and that they can do it. If they don't learn this, it doesn't matter what else is taught. Someone Else's Problem just walked in your classroom (With apologies to Douglas Adams's The Hitchhiker's Guide to the Galaxy). They don't cover this kind of thing in education classes in college, and they also don't tell you about students coming to school hungry for food or love. To assume that your job as a teacher is just to teach subject matter is like a blind man describing an elephant. The Elephant in the Classroom was walking the halls of Columbia.

Survey of Science Specialties Parent Lesson Plan Jul 05 2020 Survey of Science Specialties Course Description This is the suggested course sequence that allows two core areas of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student; materials within each semester are independent of one another to allow flexibility. Quarter 1: Archaeology The Archaeology Book takes you on an exciting exploration of history and ancient cultures. You will learn both the techniques of the archaeologist and the accounts of some of the richest discoveries of the Middle East that demonstrate the accuracy and historicity of the Bible. You will unearth: how archaeologists know what life was like in the past, why broken pottery can tell more than gold or treasure can, some of the difficulties in dating ancient artifacts, how the brilliance of ancient cultures demonstrates God's creation, history of ancient cultures, including the Hittites, Babylonians, and Egyptians, the early development of the alphabet and its impact on discovery, the numerous archaeological finds that confirm biblical history. Quarter 2: Geology The Geology Book will teach: what really carved the Grand Canyon, how thick the Earth's crust is, why the Earth is unique for life, the varied features of the Earth's surface-from plains to peaks, how sedimentary deposition occurs through water, wind, and ice, effects of erosion, ways in which sediments become sedimentary rock, fossilization and the age of the dinosaurs, the powerful effects of volcanic activity, continental drift theory, radioisotope and carbon dating, geologic processes of the past. Our planet is a most suitable home. Its practical benefits are also enhanced by the sheer beauty of rolling hills, solitary plains, churning seas and rivers, and majestic mountains—all set in place by processes that are relevant to today's entire population of this spinning rock we call home. Quarter 3: Cave Explore deep into the hidden wonders beneath the surface as cave expert Dr. Emil Silvestru takes you on an illuminating and educational journey through the mysterious world of caves. Discover the beautiful, thriving ecology, unique animals, and fragile balance of this little-seen ecosystem in caves from around the globe. The Cave Book will teach you about: a creationary model for how caves form, a history of how caves have been used by humans for shelter and worship, how old caves really are, the surprising world of Neanderthals and their connection to modern humans, how to make a stone axe and about early tools, just how long it really takes for cave formations to form, unusual animals that make caves their home, examples of how connected caves are to mythology of many cultures, the climate and geologic processes and features of caves and karst rocks, the process by which ice caves form, exploration, hazards, and record-setting caves, how caves form, and features above and below the surface. Quarter 4: Fossil Fossils have fascinated humans for centuries. But where did they come from, and how long have they been around? These and many other questions are answered in this remarkable book. The Fossil Book will teach you about: the origin of fossils, how to start your own fossil collection, what kinds of fossils can be commonly found, the age of fossils, how scientists find and preserve fossils, how to identify kinds of fossils, how the Flood affected fossil formation, the Geologic Column Diagram, the difference between evolutionists' and creationists' views on fossils, the "four Cs" of biblical creation, the different kinds of rocks fossils are found in, coal and oil formation. Learning about fossils, their origins, and how to collect them can be both fun and educational.

[Survey of Astronomy Parent Lesson Plan](#) Nov 08 2020 Course Description: Taking Back Astronomy: Take a breathtaking look at the universe in this comprehensive guide to the heavens! Sit back and explore the world at your fingertips. This book explains the scale and size of the universe that is hard for our minds to imagine, yet can only indicate the Master's hand at work. Marvel at over 50 full-color, rarely seen photos of stars, nebulas, and galaxies. Study the facts that challenge secular theories and models of the universe-how it began and how it continues to amaze the scientific community. Explore numerous evidences that point to a young universe: magnetic poles of planets, the spiral shape of galaxies, comets and how long scientists think they can last, and much more. Step out among the stars and experience the truly awesome power of God through this glimpse of His vast creation. Our Created Moon: For eons the moon has intrigued humanity. From its creation through the current issues of space exploration the moon has been both a light in the night and a protective shield of earth placed perfectly by God, regulating our seasons and keeping our atmosphere purified. Billions of dollars have been spent to reach its surface and discover its secrets; open these pages and discover those secrets for yourself. The Stargazer's Guide to the Night Sky: Explore the night sky, identify stars, constellations, and even planets. Stargaze with a telescope, binoculars, or even your naked eye. Allow Dr. Jason Lisle, a research scientist with a masters and PhD in astrophysics, to guide you in examining the beauty of God's Creation with 150 full color star-charts. Learn the best ways and optimal times to observe planets and stars with easy to use illustrations. Create or expand the hobby of

stargazing; an outdoor, educational hobby to enjoy with friends or family. Our Created Moon DVD: In this illustrated presentation, Dr. Don DeYoung looks at four of the most popular ideas evolutionists have to offer regarding the moon's origin, and logically concludes that this "lesser light" could only have been placed in its orbit by an all-knowing, all-powerful Creator. Created Cosmos DVD: Our universe is truly an amazing thing. The vastness of space boggles the mind, and the beauty of diversity we find there points to a Creator. The Psalmist wrote, "When I consider Your heavens, the work of Your fingers, the moon and the stars, which You have ordained, what is man that You are mindful of him, and the Son of man that You visit him?" Take a tour through the universe during this awe-inspiring presentation.

Spanish Translated Milady Standard Cosmetology Sep 18 2021 Milady has evolved for over 85 years to become what it is today, the cornerstone of beauty and wellness education. We are very excited and proud to announce the latest edition of Milady Standard Cosmetology, the most commonly used resource in cosmetology education. For decades since our first textbook published, it has been our commitment to provide students with the foundation in the principles and skills needed to master the science and art of cosmetology, and with this latest version that commitment has not wavered. For the new edition, celebrity stylist Ted Gibson served as Creative Director on the project. The result is a brilliant new design with over 750 new photos and a gorgeous layout, providing a visually stunning resource to engage today's learner. We also recruited a team of twelve authors, made up of top professionals and educators in the industry, to provide the most current information on concepts and techniques. During our extensive peer review and development process, we were asked for a resource that placed emphasis on essential content needed for licensure success, and we feel confident that we delivered. Milady Standard Cosmetology will continue to be a source of education that students can count on, not only while in school, but throughout their careers. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Waking Beauty Apr 25 2022 When Prince Charming finds Sleeping Beauty and her fairies, he doesn't know what to do. The fairies try to tell him, but he keeps interrupting with crazy ideas of his own such as shouting, jumping on her bed, and pouring water on her. Of course none of those work, and he is mortified when he finally hears what he has to do! A hilarious twist on the fairy tale Sleeping Beauty, this is a companion to the hit Falling for Rapunzel. **Advanced Pre-Med Studies Parent Lesson Plan** Aug 06 2020 Advanced Pre-Med Studies Course Description Semester 1: From surgery to vaccines, man has made great strides in the field of medicine. Quality of life has improved dramatically in the last few decades alone, and the future is bright. But students must not forget that God provided humans with minds and resources to bring about these advances. A biblical perspective of healing and the use of medicine provides the best foundation for treating diseases and injury. In Exploring the History of Medicine, author John Hudson Tiner reveals the spectacular discoveries that started with men and women who used their abilities to better mankind and give glory to God. The fascinating history of medicine comes alive in this book, providing students with a healthy dose of facts, mini-biographies, and vintage illustrations. It seems that a new and more terrible disease is touted on the news almost daily. The spread of these scary diseases from bird flu to SARS to AIDS is a cause for concern and leads to questions such as: Where did all these germs come from, and how do they fit into a biblical world view? What kind of function do these microbes have before the Fall? Does antibiotic resistance in bacteria prove evolution? How can something so small have such a huge, deadly impact on the world around us? Professor Alan Gillen sheds light on these and many other questions in The Genesis of Germs. He shows how these constantly mutating diseases are proof for evolution rather than evolution and how all of these germs fit into a biblical world view. Dr. Gillen shows how germs are symptomatic of the literal Fall and Curse of creation as a result of man's sin and the hope we have in the coming of Jesus Christ. Semester 2: Body by Design defines the basic anatomy and physiology in each of 11 body systems from a creationist viewpoint. Every chapter explores the wonder, beauty, and creation of the human body, giving evidence for creation, while exposing faulty evolutionist reasoning. Special explorations into each body system look closely at disease aspects, current events, and discoveries, while profiling the classic and contemporary scientists and physicians who have made remarkable breakthroughs in studies of the different areas of the human body. Within Building Blocks in Life Science you will discover exceptional insights and clarity to patterns of order in living things, including the promise of healing and new birth in Christ. Study numerous ways to refute the evolutionary worldview that life simply evolved by chance over millions of years. The evolutionary worldview can be found filtered through every topic at every age-level in our society. It has become the overwhelmingly accepted paradigm for the origins of life as taught in all secular institutions. This dynamic education resource helps young people not only learn science from a biblical perspective, but also helps them know how to defend their faith in the process.

Fairy tales in primary school. A lesson plan Jun 03 2020 Seminar paper from the year 2012 in the subject Didactics - German - Pedagogy, Linguistics, grade: 1,7, University of Koblenz-Landau (Institut für Bildung im Kindes-und Jugendalter), language: English, abstract: Since the discovery of fairy tales as children's literature by the Brothers Grimm, there seems to be a connection between children and fairy tales. When dealing with the topic of "children and fairy tale", questions arise that I would like to answer in my paper: Can fairy tales be of help to children in their development? And if so, how can this happen and what is the basis of this power of a single story to be an aid to children's development? Aren't fairy tales far too cruel and brutal for a child? Shouldn't fairy tales rather be dispensed with as a subject of primary school teaching because of their brutality alone? I will mainly refer to folk tales, as these are the first and most well-known fairy tales that most children are confronted with. In almost all cases it is the folk tales, and especially those from the Grimm collection of "Children's and Household Tales", which represent the first contact with literature for children. In the first part of my paper, I will explore the meaning of the term "fairy tale" and its genre-typical characteristics in order to create a basis for further considerations. In the second part, I will examine how, where and when folk tales came into being in the first place and what function they were originally intended to fulfill. After a short section in which the fairy tale is distinguished from related genres, I would like to look at the relationship between fairy tales and children. In this part, I would like to discuss their values for children, what positive possibilities fairy tales have to offer children and the question of the topicality and necessity of fairy tales today. Then, I would like to deal with the fairy tale as a subject of teaching and examine whether the folk tale finds its justification in today's primary school.

A Comprehensive Guide to Cosmetic Sciences Jan 11 2021

Milady's Standard Jul 25 2019 Nail technology is an exciting and rewarding profession. Each year professional nail technicians perform more than \$6 billion worth of manicuring, pedicuring, and artificial nail services for millions of fashion-conscious clients. The business of nails has grown enormously over the past five years and will continue to grow. Thus, the need for educated and competent nail technicians is expanding in the same way. Milady's Standard: Nail Technology is the complete guide to basic nail technology that every professional nail technician needs. - Preface.

In Your Face Mar 25 2022 From fairy tales and Hollywood movies to magazine ads and TV makeovers, we absorb the lesson early: beauty rules. In a world of instant photo-sharing and mobile media, it's harder than ever to escape the pressure to look good. But teens also have more tools than ever to change the message about what beauty means. This book is your guide to understanding the culture of beauty and putting it in perspective, whether it's the strange things people have done through history to enhance their looks, or why advertising thrives on making us feel insecure.--From publisher description.

Reading Beauty Aug 18 2021 When a fairy's curse—a deathlike sleep via paper cut—threatens to make her kingdom barren of books, it's up to space princess Lex to break the spell and bring books back to her people. Set in the universe of the acclaimed Interstellar Cinderella, this irrepressible fairy tale retelling will charm young readers with its brave heroine, its star-studded setting, and its hilarious, heartwarming happy ending.

Eco-Mathematics Education Apr 13 2021 Eco-Mathematics Education strives to illuminate a new way of teaching mathematics, through an artistic exploration that is fundamentally part of our natural world and as a way to provide agency in ecojustice pathways to change our world for the better.

Beauty School Feb 21 2022 There are a few teachers who I will always remember in my life. Lisa Marie is someone who makes the world a better place with love, kindness and enthusiasm. I will always be grateful to have had Lisa Marie as a teacher. Nate Hall, Graduate from the Aveda Institute Las Vegas Lisa Marie is a true inspiration, role model, mother, beauty professional, teacher, as well as entrepreneur. From the moment I met Lisa Marie my world changed I knew I met a powerhouse and what I did not know was that powerful women would soon be a role model for me someone to aspire to be and great friend. I met Lisa Marie at work where we both taught cosmetology not only did she guide me at work but she taught me life lessons. By watching her I learned how to be a stronger woman by working by her side. When Lisa Marie needs to be serious she can be but I can always count on her to make me laugh. Its an honor to call her role model and friend. Candace Harker, Owner of Prodigy Hairdressing Lisa Marie is an amazing mentor and leader. I had the incredible opportunity to work with her and she taught me so much. She is the type of leader I would love to one day be. Thank you for all your magic!! Angelo Denofrio, Master Stylist & Colorist "Sharing knowledge and experience is the things that Lisa Marie does on a daily basis, with a goal to ensure everyone succeeds. I know the powerful lessons that she presents will continuously inspire. " CJ Blue Paz, Platform Artist & Educator

The Dot Oct 08 2020 Features an audio read-along! With a simple, witty story and free-spirited illustrations, Peter H. Reynolds entices even the stubbornly uncreative among us to make a mark -- and follow where it takes us. Her teacher smiled. "Just make a mark and see where it takes you." Art class is over, but Vashti is slitting glued to her chair in front of a blank piece of paper. The words of her teacher are a gentle invitation to express herself. But Vashti can't draw - she's no artist. To prove her point, Vashti jabs at a blank sheet of paper to make an unremarkable and angry mark. "There!" she says. That one little dot marks the beginning of Vashti's journey of surprise and self-discovery. That special moment is the core of Peter H. Reynolds's delicate fable about the creative spirit in all of us.

Intro to Archaeology & Geology Parent Lesson Plan Oct 27 2019 Introduction to Archaeology and Geology Course Description This is the suggested course sequence that allows one core area of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student; materials for each semester are independent of one another to allow flexibility. Semester 1: Archaeology The Archaeology Book takes you on an exciting exploration of history and ancient cultures. You will learn both the techniques of the archaeologist and the accounts of some of the richest discoveries of the Middle East that demonstrate the accuracy and historicity of the Bible. You will unearth: how archaeologists know what life was like in the past, why broken pottery can tell more than gold or treasure can, some of the difficulties in dating ancient artifacts, how the brilliance of ancient cultures demonstrates God's creation, history of ancient cultures, including the Hittites, Babylonians, and Egyptians, the early development of the alphabet and its impact on discovery, the numerous archaeological finds that confirm biblical history, and why the Dead Sea scrolls are considered such a vital breakthrough. Filled with vivid full-color photos, detailed drawings, and maps, you will have access to some of the greatest biblical mysteries ever uncovered. Semester 2: Geology Rocks firmly anchored to the ground and rocks floating through space fascinate us. Jewelry, houses, and roads are just some of the ways we use what has been made from geologic processes to advance civilization. Whether scrambling over a rocky beach, or gazing at spectacular meteor showers, we can't get enough of geology! The Geology Book will teach: what really carved the Grand Canyon, how thick the Earth's crust is, why the Earth is unique for life, the varied features of the Earth's surface from plains to peaks, how sedimentary deposition occurs through water, wind, and ice, effects of erosion, ways in which sediments become sedimentary rock, fossilization and the age of the dinosaurs, the powerful effects of volcanic activity, continental drift theory, radioisotope and carbon dating, geologic processes of the past. Our planet is a most suitable home. Its practical benefits are also enhanced by the sheer beauty of rolling hills, solitary plains, churning seas and rivers, and majestic mountains—all set in place by processes that are relevant to today's entire population of this spinning rock we call home.

Intro to Oceanography & Ecology Parent Lesson Plan Mar 13 2021 Introduction to Ocean and Ecology Course Description This is the suggested course sequence that allows one core area of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student; materials for each semester are independent of one another to allow flexibility. Semester 1: Oceans The oceans may well be earth's final frontier. These dark and sometimes mysterious waters cover 71 percent of the surface area of the globe and have yet to be fully explored. Under the waves, a watery world of frail splendor, foreboding creatures, and sights beyond imagination awaits. The Ocean Book will teach you about giant squid and other "monsters" of the seas; centuries of ocean exploration; hydrothermal vents; the ingredients that make up the ocean; harnessing the oceans' energy; icebergs; coral reefs; ships, submarines, and other ocean vessels; the major ocean currents; El Niño; whirlpools and hurricanes; harvesting the ocean's resources; whales, dolphins, fish, and other sea creatures. Learning about the oceans and their hidden contents can be exciting and rewarding. The abundance and diversity of life, the wealth of resources, and the simple mysteries there have intrigued explorers and scientists for centuries. A better understanding of our oceans ensures careful conservation of their grandeur and beauty for future generations, and lead to a deeper respect for the delicate balance of life on planet Earth. Semester 2: Ecology Study the relationship between living organisms and our place in God's wondrous creation! Learn important words and concepts from different habitats around the world to mutual symbiosis as a product of the relational character of God. This is a powerful biology-focused course specially designed for multi-age teaching. Students will: Study the intricate relationship between living organisms and our place in God's wondrous creation Examine important words and concepts, from different habitats around the world to our stewardship of the world's resources Gain insight into influential scientists and their work More fully understand practical aspects of stewardship Investigate ecological interactions and connections in creation The Ecology Book encourages an understanding of a world designed, not as a series of random evolutionary accidents, but instead as a wondrous, well-designed system of life around the globe created to enrich and support its different features. Activities provide additional ways to make the learning experience practical.

Fresh Brewed Life Feb 09 2021 God is calling us to wake up, to shout an enthusiastic "Yes" to life, just as we say yes to our first cup of coffee each morning. Nothing would please Him more than for us to live fresh-brewed lives steeped with His love, filling the world with the marvelous aroma of Christ. This EZ Lesson Plan will provide humor, vignettes and an in depth study to small groups on this topic.

Haunted Bay City, Michigan Nov 20 2021 At the base of the Saginaw Bay on Lake Huron lies historic Bay City, a gorgeous town with a dark past. In its early days, a six-block strip known as Hell's Half Mile was an epicenter of debauchery and brutality. This tumultuous history has left a deep paranormal imprint on the area. A sinister Victorian lady terrorizes those who visit the upper level of the Bay City Antiques Center. The ghost of a disfigured little girl roams Sage Library. And the former caretaker of the USS Edson lovingly tends the ship after death as he did in life. Local author and paranormal investigator Nicole Beauchamp takes you on a bone-chilling journey through Bay City's most haunted locales.

I Love My Hair! Sep 30 2022 Now in a board book format--the bestseller that encourages young black children to not only feel good about their special hair but to also feel proud of their heritage. Full color. 11 spreads. Baby/Preschool.

Lesson Plans for Milady's Professional Barber-Styling Sep 06 2020 A complete guide to presenting all the content material contained in Milady's Standard Textbook of Professional Barber-Styling. The lesson plan directs all activities toward the achievement of specific goals. It suggests new approaches for using instructional material and makes the teacher extremely sensitive to sequential form (the order in which the lesson is developed) a factor of great importance in effective teaching. All lessons follow the order of topics within each chapter of the text. Each lesson is numbers and includes a topic headline, a topic reference, lesson objective, facility to be used, time allotment, material and equipment, printed matter, visual and audio aids, special research material, preparatory assignments for students, a listing of materials students must bring to class, motivation to be employed by the instructor, lesson outline, summary statements, evaluation of the students and assignments. Key features include:

Master Educator Dec 10 2020 Milady's Master Educator, Third Edition provides the backbone of the instructor theory for the beauty and wellness educator. The text presents educators with the teaching skills and educational judgments necessary to become an effective and successful instructor. The content in Master Educator is designed for flexibility, being used in programs ranging from a basic overview of instructor training to programs that require more advanced teaching techniques. Presented in a conversational, easy-to-understand style, it uses many pedagogical features to emphasize important information and powerful teaching techniques. Master Educator serves the future instructor as a valuable, fundamental learning tool, and the seasoned instructor with the strategies needed to adapt to the changing landscape of classroom learning. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
