Unbroken Faith Oct 21 2021

When a parent hears that their child has a disability, hearts and hopes are often broken. But faith doesn't have to be. In *Unbroken Faith*, Dianne Dokko Kim comes alongside you as a fellow special needs parent to help you reconcile the premise of a good God with the devastating realities of raising

a disabled child. Kim courageously articulates deep-seated, unspoken doubts and fears you may have but are afraid to voice: Will my child still have a full life? Can I do this? Where is God in all this? As you are adjusting to your new normal, Kim's biblical-based encouragement will help you understand that you are not alone, that God gets it, and that God's Word is entirely relevant to the raw and messy yet hallowed spaces of special needs parenting.

**The Department of Rare Books and Special Collections** Feb 10 2021

International Bestseller "With its countless revelations about the dusty realms of rare books, a likable librarian sleuth who has just the right balance of compassion and wit, and a library setting that is teeming with secrets, *The Department of Rare Books and Special Collections* is a rare treat for readers. I loved this book!"—Matthew Sullivan, author of *Midnight at the Bright Ideas Bookstore* *Anxious People* meets the delights of

bookish fiction in a stunning debut following a librarian whose quiet life is turned upside down when a priceless manuscript goes missing. Soon she has to ask: what holds more secrets in the library—the ancient books shelved in the stacks, or the people who preserve them? Liesl Weiss long ago learned to be content working behind the scenes in the distinguished rare books department of a large university, managing details and working behind the scenes to make the head of the department look good. But when her boss has a stroke and she's left to run things, she discovers that the library's most prized manuscript is missing. Liesl tries to sound the alarm and inform the police about the missing priceless book, but is told repeatedly to keep quiet, to keep the doors open and the donors happy. But then a librarian unexpectedly stops showing up to work. Liesl must investigate both disappearances, unspooling her colleagues' pasts like the threads of a rare

book binding as it becomes clear that someone in the department must be responsible for the theft. What Liesl discovers about the dusty manuscripts she has worked among for so long—and about the people who care for and revere them—shakes the very foundation on which she has built her life. The Department of Rare Books and Special Collections is a sparkling book-club read about a woman struggling to step out from behind the shadows of powerful and unreliable men, and reveals the dark edge of obsession running through the most devoted bookworms.

### **Formulas and Theorems for the Special Functions of Mathematical Physics**

Jul 18 2021 This is a new and enlarged English edition of the book which, under the title "Formeln und Satze fur die Speziellen Funktionen der mathe matischen Physik" appeared in German in 1946. Much of the material (part of it unpublished) did not appear in the earlier editions. We hope that these additions will be useful and yet not too numerous for the purpose of locating .with ease any particular result. Compared to the first two (German) editions a change has taken place as far as the list of references is concerned. They are generally restricted to books and monographs and accomodated at the end of each individual chapter. Occasional references to papers follow those results to which they apply. The

authors felt a certain justification for this change. At the time of the appearance of the previous edition nearly twenty years ago much of the material was scattered over a number of single contributions. Since then most of it has been included in books and monographs with quite exhaustive bibliographies. For information about numerical tables the reader is referred to "Mathematics of Computation", a periodical publis hed by the American Mathematical Society; "Handbook of Mathe matical Functions" with formulas, graphs and mathematical tables National Bureau of Standards Applied Mathematics Series, 55, 1964, 1046 pp., Government Printing Office, Washington, D.C., and FLETCHER, MILLER, ROSENHEAD, Index of Mathematical Tables, Addison-Wesley, Reading, Mass.) .. There is a list of symbols and abbreviations at the end of the book.
