Light: Medicine of the

Future Sep 29 2019

Light: Medicine of the Future challenges the modern myth that the sun is dangerous to

our well-being and claims that technological advancements, such as most fluorescent lighting, sunglasses, tanning lotions, and our indoor lifestyles, may be more harmful than helpful. Integrating scientific research, clinical experience, and his own insights, Dr. Jacob Liberman has worked effectively with more than 15,000 individuals, from the learning disabled and physically/emotionally traumatized to business executives and Olympic athletes. The book discusses the use of light in the treatment of various cancers, depression, stress, visual problems, PMS, sexual dysfunction, learning

disabilities, and the human immune system.

[Space Microelectronics Volume 2: Integrated Circuit Design for Space Applications](#) Aug 09

2020 This invaluable second volume of a two-volume set is filled with details about the integrated circuit design for space applications. Various considerations for the selection and application of electronic components for designing spacecraft are discussed. The basic constructions of submicron transistors and schottky diodes during the technological process of production are explored. This book provides details on the

energy consumption minimization methods for microelectronic devices. Specific topics include: Features and physical mechanisms of the effect of space radiation on all the main classes of microcircuits, including peculiarities of radiation impact on submicron integrated circuits;Special design, technology, and schematic methods of increasing the resistance to various types of space radiation;Recommendations for choosing research equipment and methods for irradiating various samples;Microcircuit designers on the composition of test elements for the study of the effect of

radiation;Microprocessors, circuit boards, logic microcircuits, digital, analog, digital-analog microcircuits manufactured in various technologies (bipolar, CMOS, BiCMOS, SOI);Problems involved with designing high speed microelectronic devices and systems based on SOS-and SOI-structures;System-on-chip and system-in-package and methods for rejection of silicon microcircuits with hidden defects during mass production.

Illusionarium Jan 02 2020 What if the world holds more dangers—and more wonders—than we have ever known? And what if there is more than one world? From

Heather Dixon, author of the acclaimed *Entwined*, comes a brilliantly conceived adventure that sweeps us from the inner workings of our souls to the far reaches of our imaginations. Jonathan is perfectly ordinary. But then—as every good adventure begins—the king swoops into port, and Jonathan and his father are enlisted to find the cure to a deadly plague. Jonathan discovers that he's a prodigy at working with a new chemical called fantillium, which creates shared hallucinations—or illusions. And just like that, Jonathan is knocked off his path. Through richly developed parallel worlds, vivid action, a healthy dose of humor, and

gorgeous writing, Heather Dixon spins a story that calls to mind *The Night Circus* and Pixar movies, but is wholly its own.
