He walks you through how to: • Write a compelling "narrative" for your presentation • Understand and analyze your audience to customize your message • Select the best software or method to house your work The author also outlines the most commonly-used charts and graphs to best display your data and shares tips on how to best prepare for the live delivery of your masterpiece.

The Soft Landing Method – A step by step guide to stopping antidepressants the smart way and starting your SSRI-free life again Jun 14 2021 Everything you need to know to ensure you have a "soft landing" as you come off antidepressants A guide to getting off SSRI antidepressants and starting your drug free life again, from Benjamin Kramer, best-selling author of "Brain Renovation". In this clear and concise guide, Benjamin Kramer gives you an easy to implement blueprint for coming off antidepressants such as SSRIs (Selective Serotonin Re-uptake Inhibitors) using a variety of little-known techniques and tips. With a scientifically-designed tapering plan, including the use of certain other drugs and supplements where required, you can avoid coming in for landing too hard and crashing. Done properly, you CAN have a soft landing off antidepressants. If you are reading this, you are probably taking one of the following drugs and have decided that it is time to slowly start tapering down – Prozac (Fluoxetine) Lexapro (Escitalopram) Zoloft (Sertraline) Effexor (Venlafaxine) Cymbalta (Duloxetine) Or one of the other atypical antidepressents such as mirtazapine (Remeron/Avanza), buspirone (Buspar), tianeptine (Stablon) or moclobemide (Aurorix) In his typical balanced style, Kramer does not tell you whether you should or shouldn't be on antidepressants. This is a decision for you and your doctor. Antidepressants help a lot of people around the world get their life back and regain the ability to enjoy living again. However, if the decision has been made to stop taking antidepressants, this book contains all the information you will need to succeed, including – – Planning ahead to maximize your chances of success – Lifestyle changes that may be required during and after the process of quitting – How to minimize the nasty effects of 'discontinuation syndrome', where your body takes time to adjust to life without the drug in your system – The correct nutrition to rebuild your brain – Recommended supplements to assist the process – Potential short term medication options to manage the acute phase ??? Kramer doesn't promise it will be a walk in the park. However what he does make clear is that with a little effort and planning, you can regain your drug free life again.

Time Management: A Step by Step Guide to Planning Your Day for Extreme Productivity (How to Plan Your Week, Stay Productive and Motivated the Entire Time) Jul 16 2021 Do you feel like you never have enough hours to complete everything on your to-do list and still have time for the things you care about? Have you ever wondered how highly successful people get things done without losing their sanity? Then you need to keep reading... "Until we can manage time, we can manage nothing else." This famous quote rightly points out that every aspect of your life is determined by how you use your time. That's because your life is made up of time. Time is your most precious commodity and it's limited. Yet you may be easily losing time due to failure to manage it or by wasting it on unnecessary activities. On the other hand, you may be working hard and yet fail to achieve the desired results. This book will help you to master your time and conquer the results. Even for the most successful people, it's a work in progress. Don't feel bad if your time managing skills aren't what they should be. The greatest names probably started off as you, but through self-discipline, they were able to succeed. Time management skills are the solution. They usually involve something simple, such as making a to-do list, or calculating how much time you waste on apps that are irrelevant to your work. Although they may seem too simple to work, you'll be surprised at how much of a dent they can make. How to Plan Your Week, Stay Productive and Motivated the Entire Time Here Is A Preview Of What You'll Learn In This Book... How to Properly Structure Your Time for Maximum Productivity Coming Up with Methods to Make Your Chores Easier How to Start Early in Order to Get it All Done Having Goals and Routines to Save Time Coming Up with a System to Accomplish Regular Tasks

Faster Helpful Ways to Get More Done in Less Time Much more... Time is running out! It is time to discover the true value of time and not put it to waste. Benjamin Franklin reminded us that time is money. However, in reality, it is more than that. It is essentially life itself. Every minute that is gone is equivalent to wasted moment of your life, too. A Step-by-Step Guide to Exploratory Factor Analysis with SPSS Jun 26 2022 This is a concise, easy to use, step-by-step guide for applied researchers conducting exploratory factor analysis (EFA) using SPSS. In this book, Dr. Watkins systematically reviews each decision step in EFA with screen shots and code from SPSS and recommends evidence-based best-practice procedures. This is an eminently applied, practical approach with few or no formulas and is aimed at readers with little to no mathematical background. Dr. Watkins maintains an accessible tone throughout and uses minimal jargon to help facilitate grasp of the key issues users will face while applying EFA, along with how to implement, interpret, and report results. Copious scholarly references and quotations are included to support the reader in responding to editorial reviews. This is a valuable resource for upper-level undergraduate and postgraduate students, as well as for more experienced researchers undertaking multivariate or structure equation modeling courses across the behavioral, medical, and social sciences.

Step by Step Nov 27 2019 Since Muriel Zink began her own recovery work over thirty years ago, many people in self-help and anonymous recovery programs have shared their concern with her about finding concrete, practical ways to use the Twelve Step model, developed originally by Alcoholics Anonymous. In STEP BY STEP, Muriel devotes each month of the year to an in-depth exploration of one of the Twelve Steps, with daily entries. The steps are presented in the chronological order of the months, though any of the meditations can be used out of sequence. No matter where we are in our recovery, these wise, inspiring messges and meditations can help us "step" our way to healthier, more productive lives.

Step by Step Apr 12 2021 TV adventurer Simon Reeve has journeyed across epic landscapes, dodged bullets on frontlines, walked through minefields, and been detained for spying by the KGB. His travels have taken him across jungles, deserts, mountains and oceans, and to some of the most beautiful, dangerous and remote regions of the world. In this revelatory account of his life, Simon gives the full story behind some of his favourite expeditions – including navigating a minefield on the Armenian border, playing polo with the corpse of a headless goat, and ceremonially naming a Kazakh baby. He traces his own inspiring personal journey back to leaving school without qualifications, teetering on a bridge, and then overcoming his challenges by climbing to a "Lost Valley" and changing his life...step by step.

Doing Your Child Observation Case Study Sep 25 2019 Observation of young children, their development, and planning for next steps is a fundamental requirement of early years practice. Awareness of appropriate techniques, understanding what you are observing, as well as what it all means in terms of planning for learning is an essential yet difficult skill to acquire. This is a very practical book on observing young children that supports you in preparing a child observation case study. Taking a step-by-step approach the book covers the whole process beginning with choosing a child to study before discussing the fundamentals of child observation. It includes invaluable guidance on: The ethics of your study Appropriate techniques and tools for gathering data Observations that are useful How to select material to include Analyzing or interpreting the information Potential pitfalls The book includes many examples of good observations, which help show how your own observations can be evaluated, analyzed and used. In addition there is a fully worked example of a child observation case study in the penultimate chapter. If you are studying early years or early childhood studies at foundation, undergraduate or Master's degree level then this book will really help you get to grips with how a good child observation study unfolds and develops. Cath Arnold works at the Pen Green Centre, an internationally renowned Children's Centre in Corby, UK. She is author of Observing Harry (Open University Press 2003). This is a fascinating and accessible new book on child observation case study for students and professionals. Cath Arnold integrates theoretical perspectives and practical examples of observations with remarkable clarity in this comprehensive guidance to child case study. Shirley Allen, Senior Lecturer Early Childhood Studies, Middlesex University It is quickly evident to the reader that 'Doing Your Child Observation Case Study' is steeped in the expertise and extensive experience of its author. The practical guidance it offers is likely to prove invaluable for childhood studies students and early career researchers in the field. Yet Cath Arnold's 'step-by-step guide' goes far beyond the practical. She shines vital light on the complex nuances of values, beliefs, ethics and rights inherent in child case study and addresses with clarity and credibility the crucial role that theory can play in supporting our understanding of children's actions. This text is an excellent addition to the childhood studies bookshelf. Dr Jane Murray, Centre for Education and Research, University of Northampton, UK Cath Arnold has provided a rich resource for those who want to understand more about children, their wellbeing and their learning. This detailed approach to child observation offers guidance on why, how and what to observe, and how to interpret what is observed. Rich in examples collected over many years 'Doing your Child Observation Case Study' will get many early years practitioners started on their own learning journeys as they watch and engage with young children to develop detailed impressions of children's development. Professor Cathy Nutbrown, Head of The School of Education, The University of Sheffield In this new book Cath is once more supporting early childhood educators to engage in the strong UK tradition of child observations; the tradition of Piaget, Novara, Darwin and Susan Isaacs. She has developed her own understanding of the importance of observational studies building on the giants whose shoulders we all stand on. This powerful publication combines insights into both the theory and practice of developing child observations in an early years setting. Cath demonstrates how detailed and powerful records of children's learning and development speak to practitioners and hold their value over time in a world where early educators are increasingly obliged to devote enormous amounts of their energy filling in forms, schedules and are hard pressed to reject the pressure of tick box developmental checks and imposed tracking schemes. This book lights the way to a much deeper way of documenting children's learning and development. As educators we need to match children's learning with rich curriculum content and this book reminds us that we can only achieve this critical pedagogical task if we have closely watched what it is that excites and interests each individual child. 'Doing Your Child Observation Case Study' shows us the way to be well informed practitioners able to offer children a really rich learning experience. Dr. Margy Whalley, Director of the Research, Development and Training Base at the Pen Green Centre and Centre for Children and their Families

Supporting Behavior for School Success Aug 29 2022 Designed for busy teachers and other school-based professionals, this book presents step-by-step guidelines for implementing seven highly effective strategies to improve classroom

management and instructional delivery. These key low-intensity strategies are grounded in the principles of positive behavior intervention and support (PBIS), and are easy to integrate into routine teaching practice. Chapters discuss exactly how to use each strategy to decrease disruptive behavior and enhance student engagement and achievement. Checklists for success are provided, together with concise reviews of the evidence base and ways to measure outcomes. Illustrative case examples span the full K–12 grade range. Reproducible intervention tools can be downloaded and printed in a convenient 8 1/2" x 11" size. See also Managing Challenging Behaviors in Schools, by Kathleen Lynn Lane et al., which shows how these key strategies fit into a broader framework of prevention and intervention.

A Step-by-Step Guide to Case-Based Collaborative Learning (CBCL) Aug 17 2021 This book is about Case-Based Collaborative Learning (CBCL) for medical educators. CBCL combines elements from team-, case- and problem-based based learning using a flipped classroom model. This book presents a detailed "how to" guide on how to create CBCL classroom materials, how to facilitate vivid discussions, and how to support students and faculty in a CBCL curriculum. The first chapter explores the CBCL method in context of established educational principles. The second chapter provides a step-wise guide to creating CBCL teaching materials from scratch or adapting existing resources. Chapter three discusses how to support both – faculty and students – in making the most out of in-class case discussions. The last chapter explores modifications to the CBCL method that have evolved over time in adapting to teaching remotely, as well as promoting self-directed learning skills in students. While originally developed in context of undergraduate medical education, the CBCL method is of interest to anyone in higher education that values flipped classroom methods and discussion-based teaching.
