A Person-Centered Approach and the Rogerian Tradition Jun 30 2022 From the Book: "it is hypothesized that the therapist wants to understand for no other reason but to understand. If the therapist is motivated to understand solely to be a change agent for the client, then the facilitative mechanisms may not be sufficient because a tendency toward unconditional acceptance will not effectively emerge." "the published literature in the 1970s suggests that person-centered therapy (PCT) researchers, rather than pursuing novel avenues of empirical inquiry, devoted substantial time in defending PCT against - what now appear to be - unfounded claims made by a group of social scientists who held significant professional interest in seeing through the dismantling of the person-centered approach." Book Summary: This book is about a person-centered approach to counseling and psychotherapy as developed by the psychologist Carl Rogers (1902-1987) and his colleagues. In addition, this book is also intended to be a handbook on the person-centered approach and the Rogerian tradition for use in academic and non-academic settings alike. Each chapter is briefly summarized below. Chapter 1 ("A Person-Centered Approach and the Structure of Scientific Revolutions") examines the trend of scientific inquiry in psychotherapy research, specifically focusing on events and changes that took place beginning in the 1970s and are argued to have substantially influenced the direction of psychotherapy research in the following decades. In particular, these changes are suggested to have been guided by the choices made by a small but influential group of behavior and psychoanalytic-oriented researchers, which arguably led to changes in the scientific methods used to investigate the effectiveness of psychotherapeutic treatments; and, as will be shown in this chapter, led to the decline and disappearance of Carl Rogers's person-centered approach. This chapter suggests that through a method of allegiance-guided scientific inquiry, the Rogerian tradition was systematically dismantled by a group of social scientists that held considerable professional interests to do so. Chapter 2 ("A Person-Centered Approach to Multicultural Counseling Competence") examines current and historical trends in psychotherapy research and practice with racial/ethnic minority populations. Using psychotherapy evidence from both the latter half of the 20th century and the initial decades of the 21st century, cultural adaptations to previously hypothesized person-centered therapy mechanisms of change are proposed. Chapter 3 ("A Person-Centered Approach to the Treatment of Borderline Personality Disorder") addresses psychotherapy with a person described as possessing a borderline personality disorder (BPD). In particular, a selection of mainstream approaches is reviewed to examine unique and universal aspects of current thinking about this treatment population. Following this review, an expanded analysis of person-centered therapy is offered, examining current research evidence and the mechanisms of change hypothesized to occur in the person-centered treatment of BPD. Chapter 4 ("A Person-Centered Approach to the Treatment of Combat Veterans with Posttraumatic Stress Disorder") examines posttraumatic stress disorder through the lens of military combat trauma that results in a breakdown of a combat veteran's sense of self and the world. In the effective treatment of combat-related posttraumatic stress disorder, a therapist must help the veteran reorganize the self-structure that has become incongruent with his or her precombat-trauma self following his or her return home from war. For the therapist to facilitate a veteran's becoming whole, he or she must be genuinely congruent in the relationship.

Critical Thinking Within the Library Program Apr 16 2021 While academic librarians frequently discuss critical thinking and its relationship to information literacy, the literature does not contain an abundance of sources on the topic. Therefore, this work provides a current and timely perspective on the possible roles of critical thinking within the library program. The work contains a variety of approaches likely to benefit the practicing librarian. It begins with a review of the literature, followed by theoretical approaches involving constructivism and the Socratic method. Readers will find pieces on the integration of critical thinking into the first-year experience and course-specific case studies, as well as a selection on a campus-wide critical thinking project. In each of the pieces, librarians are exploring new ways to meet their instructional goals, including the goal of teaching critical thinking skills to students across the curriculum. This book was originally published as a special issue of *College & Undergraduate Libraries*.

The Yellow Wallpaper Illustrated Sep 21 2021 "The Yellow Wallpaper" is a short story by American writer Charlotte Perkins Gilman, first published in January 1892 in *The New England Magazine*. [1] It is regarded as an important early work of American feminist literature, due to its illustration of the attitudes towards mental and physical health of women in the 19th century. Narrated in the first person, the story is a collection of journal entries written by a woman whose physician husband (John) has rented an old mansion for the summer. Forgoing other rooms in the house, the couple moves into the upstairs nursery. As a form of treatment, the unnamed woman is forbidden from working, and is encouraged to eat well and get plenty of air, so she can recuperate from what he calls a "temporary nervous depression - a slight hysterical tendency", a diagnosis common to women during that period

Changing the Subject Sep 09 2020 *Changing the Subject* explores ways of engaging across difference. In this first book-length study of the concept of empathy from a rhetorical perspective, Lisa Blankenship frames the classical concept of pathos in new ways and makes a case for rhetorical empathy as a means of ethical rhetorical engagement. The book considers how empathy can be a deliberate, conscious choice to try to understand others through deep listening and how language and other symbol systems play a role in this process that is both cognitive and affective. Departing from agonistic win-or-lose rhetoric in the classical

Greek tradition that has so strongly influenced Western thinking, Blankenship proposes that we ourselves are changed (“changing the subject” or the self) when we focus on trying to understand rather than simply changing an Other. This work is informed by her experiences growing up in the conservative South and now working as a professor in New York City, as well as the stories and examples of three people working across profound social, political, class, and gender differences: Jane Addams’s activist work on behalf of immigrants and domestic workers in Gilded Age Chicago; the social media advocacy of Brazilian rap star and former maid Joyce Fernandes for domestic worker labor reform; and the online activist work of Justin Lee, a queer Christian who advocates for greater understanding and inclusion of LGBTQ+ people in conservative Christian churches. A much-needed book in the current political climate, *Changing the Subject* charts new theoretical ground and proposes ways of integrating principles of rhetorical empathy in our everyday lives to help fight the temptations of despair and disengagement. The book will appeal to students, scholars, and teachers of rhetoric and composition as well as people outside the academy in search of new ways of engaging across differences.
