Discourse, Identities and Roles in Specialized Communication Oct 09 2020 The studies presented in this volume focus on two distinct but related areas of specialized communication professional and academic settings, resting on an anti-essentialist notion of identity as a phenomenon that emerges from the dialectic between individual and society. The authors start from a detailed analysis of discourse practices as evidenced in texts, their production and the professional performance patterns which underlie such practices, and explore the way the actors, roles and identities are constructed in language and discourse. In particular, by highlighting discursive attitudes and aptitudes, they underscore the need to understand discourse in light of norms of professional responsibility, showing that not only do professionals and academics use discourse to create self-identity, but they also use identity constructed through discourse to influence society.

The United States Holocaust Memorial Museum Encyclopedia of Camps and Ghettos, 1933-1945: Volume III Sep 19 2021
Accounts of significant sites in Hungary, Vichy France, Italy, and other nations, part of the multi-volume reference praised as a "staggering achievement" (Jewish Daily Forward). This third volume in the monumental seven-volume encyclopedia, prepared by the Jack, Joseph, and Morton Mandel Center for Advanced Holocaust Studies at the United States Holocaust Memorial Museum, offers a comprehensive account of camps and ghettos in, or run by, Croatia, Hungary, Italy, Romania, Bulgaria, Slovakia, and Vichy France (including North Africa). Each entry discusses key events in the history of the ghetto; living and working conditions; activities of the Jewish Councils; Jewish responses to persecution; demographic changes; and details of the ghetto's liquidation. Personal testimonies help convey the character of each ghetto, while source citations provide a guide to additional information. Documentation of hundreds of smaller sites—previously unknown or overlooked in the historiography of the Holocaust—make this an indispensable reference work on the destroyed Jewish communities of Eastern Europe.

Mussolini's policemen Nov 21 2021
How successful was Mussolini in creating a force of loyal and committed policemen to defend his regime and assist in the creation of a new fascist civilization? How far were the Italian police transformed under Mussolini, and how did policemen experience the dictatorship? This book examines Italy's regular police in the context of fascism's efforts to modernise and establish ideological control over the state. Contrasting the regime's idealised representations with the more humdrum realities of everyday practice, the book considers the impact of the dictatorship on the Italian police and their personnel. Presenting an inside perspective on fascist repression, it focuses particularly on recruitment, training and professionalism in the Interior Ministry Police, as well as officers' ideological orientation, working conditions and quality of life. This book will appeal to students and researchers in police history, Italian fascism and, more generally, conflict and oppression in the twentieth century.

Europe on the move Nov 09 2020
Mass population displacement affected millions of Europe's civilians across the different theatres of war in 1914-18. At the end of the war, a senior Red Cross official wrote 'there were refugees everywhere. It was as if the entire

world had to move or was waiting to move'. Europe on the move: refugees in the era of the Great War, 1912-23 is the first attempt to understand their experiences as a whole and to establish the political, social and cultural significance and ramifications of the wartime refugee crisis. Drawing on original research by leading specialists from more than a dozen countries, it will become the definitive work on the subject and will appeal to anyone who wishes to understand how governments and public opinion responded to refugees a century ago.

Policing European Metropolises Feb 10 2021 Understanding the politics of security in city-regions is increasingly important for the study of contemporary policing. This book argues that national and international governing arrangements are being outflanked by various transnational threats, including the cross-border terrorism of the attacks on Paris in 2015 and Brussels in 2016; trafficking in people, narcotics and armaments; cybercrime; the deregulation of global financial services; and environmental crime. Metropolises are the focal points of the transnational networks through which policing problems are exported and imported across national borders, as they provide much of the demand for illicit markets and are the principal engines generating other policing challenges including political protest and civil unrest. This edited collection examines whether and how governing arrangements rooted in older systems of national sovereignty are adapting to these transnational challenges, and considers problems of and for policing in city-regions in the European Union and its single market. Bringing together experts from across the continent, Policing European Metropolises develops a sociology of urban policing in Europe and a unique methodology for comparing the experiences of different metropolises in the same country. This book will be of value to police researchers in Europe and abroad, as well as postgraduate students with an interest in policing and urban policy.

The Social, Political and Historical Contours of Deportation Jan 30 2020 In recent years states across the world have boosted their legal and institutional capacity to deport noncitizens residing on their territory, including failed asylum seekers, "illegal" migrants, and convicted criminals. Scholars have analyzed this development primarily through the lens of immigration control. Deportation has been viewed as one amongst a range of measures designed to control entrance, distinguished primarily by the fact that it is exercised inside the territory of the state. But deportation also has broader social and political effects. It provides a powerful way through which the state reminds noncitizens that their presence in the polity is contingent upon acceptable behavior. Furthermore, in liberal democratic states immunity from deportation is one of the key privileges that citizens enjoy that distinguishes them from permanent residents. This book examines the historical, institutional and social dimensions of the relationship between deportation and citizenship in liberal democracies. Contributions also include analysis of the formal and informal functions of administrative immigration detention, and the role of the European Parliament in the area of irregular immigration and borders. The book also develops an analytical framework that identifies and critically appraises grassroots and sub national responses to migration policy in liberal democratic societies, and considers how groups form after deportation and the employment of citizenship in this particular context, making it of interest to scholars and international policy makers alike. "It is commonly surmised that the increased flows of goods, ideas, finance and people are slowly leading to the dissolution of boundaries between nation-states. However, as the varied and excellent chapters in this collection demonstrate, the enforcement of state power through detention and deportation is still a real and growing feature of contemporary political life. Expulsion has always been a moral sanction (think

of Adam and Eve being banished from the Garden of Eden or the ostracism directed against dissidents in ancient Athens, who were forced to leave for ten years). As the editors suggest, deportation remains a means of enforcing a normative order ('a community of values'), while the authors and editors of this book have expanded the subject-matter to include the deportees' perspectives and the effects of deportation on families, other potential victims and on those whose social inclusion has been affirmed by the exclusion of others. These studies will enrich and enlarge the study of the more naked forms of state power." - Robin Cohen, Professor Emeritus of Development Studies, University of Oxford "This wide-ranging, well-researched, and highly informative work is a major contribution to the growing body of scholarship examining the harsh consequences of deportation around the world. The editors have gathered an impressive group of scholars who craft an eclectic view of how deportation has evolved, what it may signify, and how it now works in various settings. With its inclusion of historical, institutional, comparative, and finely-textured, sensitive experiential studies, this book offers an important--if frequently distressing--overview of phenomena that deserve our full attention." - Daniel Kanstroom, Professor of Law and Director, International Human Rights Program, Boston College Law School
