The Book of Voices Jul 17 2021 In ancient Judaea, a prophet who has lost her memory channels the voices of people from the Hebrew Bible. Seeking to rediscover her true self, Elisheva discovers the unexpected nature of God. Elisheva not only brings forth the voices of the well-known people of the Bible, such as Adam, Abraham, Moses, and King David, but also those whom the Bible quickly passes over. People such as Moab (bastard child of Lot and his daughter), Zimri (who lasted one week as King of Israel), and Jushab-Hesed (a child at the rededication of the temple) speak of moments in their lives, as do women that the Bible did not bother to name: the Wife of Cain, the Daughter of Jephthah, and the Shulammite. The voices cover thousands of years of mythic history, from the creation of the universe to the end of the Prophetic Age. Angels and prophets move through space and time, travel the branching paths of possible histories, step into the world of dreams, and cross the border between life and death. Throughout the lives of those who discover, defend, and oppose the faith in one God, often guided by the workings of a hidden school of prophets, the Sisters of Sarah, they face what it means to be human and to do what's right, as they help people to be better people and help God learn to be a better God.

Protégé of design legend Massimo Vignelli and partner in the New York office of the international design firm Pentagram, Michael Bierut has had one of the most varied and successful careers of any living graphic designer, serving a broad spectrum of clients as diverse as Saks Fifth Avenue, Harley-Davidson, the Atlantic Monthly, the William Jefferson Clinton Foundation, Billboard, Princeton University, the New York Jets, the Brooklyn Academy of Music, and the Morgan Library. How to, Bierut's first career retrospective, is a landmark work in the field. Featuring more than thirty-five of his projects, it reveals his philosophy of graphic design—how to use it to sell things, explain things, make things look better, make people laugh, make people cry, and (every once in a while) change the world. In his entertaining voice, the artist walks us through each from start to finish, mixing historic images, preliminary drawings (including full-size reproductions of the notebooks he has maintained for more than thirty-five years), working models and rejected alternatives, as well as the finished work. Throughout, he provides insights into the creative process, his working life, his relationship with clients, and the struggles that any design professional faces in bringing innovative ideas to the world. The Concept of the Political Jul 25 2019 In this, his most influential work, legal theorist and political philosopher Carl Schmitt argues that liberalism's basis in individual rights cannot provide a reasonable justification for sacrificing oneself for the state—a critique as cogent today as when it first appeared. George Schwab's introduction to his translation of the 1932 German edition highlights Schmitt's intellectual journey through the turbulent period of German history leading to the Hitlerian one-party state. In addition to analysis by Leo Strauss and a foreword by Tracy B. Strong placing Schmitt's work into contemporary context, this expanded edition also includes a translation of Schmitt's 1929 lecture "The Age of Neutralizations and Depoliticizations," which the author himself added to the 1932 edition of the book. An essential update on a modern classic, *The Concept of the Political, Expanded Edition* belongs on the bookshelf of anyone interested in political theory or philosophy.

On Leibniz: Expanded Edition Oct 08 2020 Contemporary philosopher John Searle has characterized Gottfried Wilhelm Leibniz (1646–1716) as "the most intelligent human being who has ever lived." The German philosopher, mathematician, and logician invented calculus (independently of Sir Isaac Newton), topology, determinants, binary arithmetic, symbolic logic, rational mechanics, and much more. His metaphysics bequeathed a set of problems and approaches that have influenced the course of Western philosophy from Kant in the eighteenth century until the present day. *On Leibniz* examines many aspects of Leibniz's work and life. This expanded edition adds new chapters that explore Leibniz's revolutionary deciphering machine; his theoretical interest in cryptography and its ties to algebra; his thoughts on eternal recurrence theory; his rebuttal of the thesis of improbability in the world and cosmos; and an overview of American scholarship on Leibniz. Other chapters reveal Leibniz as a substantial contributor to theories of knowledge. Discussions of his epistemology and methodology, its relationship to John Maynard Keynes and Talmudic scholarship, broaden the traditional view of Leibniz. Rescher also views Leibniz's scholarly development and professional career in historical context. As a "philosopher courtier" to the Hanoverian court, Leibniz was associated with the leading intellectuals and politicians of his era, including Spinoza, Huygens, Newton, Queen Sophie Charlotte, and Tsar Peter the Great. Rescher extrapolates the fundamentals of Leibniz's ontology: the theory of possible worlds, the world's contingency, space-time frameworks, and intermonadic relationships. In conclusion, Rescher positions Leibniz as a philosophical role model for today's scholars. He argues that many current problems can be effectively addressed with principles of process philosophy inspired by Leibniz's system of monadology.

On Weaving Apr 25 2022 Written by one of the twentieth century's leading textile artists, this splendidly illustrated book is a luminous meditation on the art of weaving, its history, its tools and techniques, and its implications for modern design. First published in 1965, 'On Weaving' bridges the transition between handcraft and the machine-made, highlighting the essential importance of material awareness and the creative leaps that can occur when design problems are tackled by hand. With her focus on materials and handlooms, Anni Albers discusses how technology and mass production place limits on creativity and problem solving, and makes the case for a renewed embrace of human ingenuity that is particularly important today. 0Now available for a new generation of

readers, this expanded edition of 'On Weaving' updates the book's original black-and-white illustrations with full-color photos, and features an afterword by Nicholas Fox Weber and essays by Manuel Cirauqui and T'ai Smith that shed critical light on Albers and her career.

Red Ocean Traps (Harvard Business Review Classics) Dec 10 2020 As established markets become less profitable, companies increasingly need to find ways to create and capture new markets.

Despite much investment and commitment, most firms struggle to do this. What, exactly, is getting in their way? The authors of the best-selling book *Blue Ocean Strategy* have spent over a decade exploring that question. They have seen that the trouble lies in managers' mental models--ingrained assumptions and theories about the way the world works. Though these models may work perfectly well in mature markets, they undermine executives' attempts to discover uncontested new spaces with ample potential (blue oceans) and keep companies firmly anchored in existing spaces where competition is bloody (red oceans). This article describes how to break free of these red ocean traps. To do that, managers need to: (1) Focus on attracting new customers, not pleasing current customers; (2) Worry less about segmentation and more about what different segments have in common; (3) Understand that market creation is not synonymous with either technological innovation or creative destruction; and (4) Stop focusing on premium versus low-cost strategies. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world--and will have a direct impact on you today and for years to come.

Matches Nov 20 2021 A 2nd, expanded edition, with a new Foreword by Alexander Kluge. The match: little stick tipped with combustible stuff, sparked by friction; typically comes in a book or a box or a bundle (the point being: never alone). The highly portable match lighting more or less when required was a great nineteenth-century innovation. Before, we had only Danger and Poison matches, and countless match-induced accidents and suicides. We still have not engineered mischief out of the match. One little lucifer, God's little helper, lit in the company of its sisters and brothers will, if we let them, afford us a miniature inferno. Are we responsible for the recklessness of thought? There will always be match tricks to go very wrong. How many times have we amused ourselves in the schoolyard, lighting up the whole passel of ideas within our reach, getting us in trouble? And now that we are older, we can strike anywhere. We count on sparks to leap long distances virtually, to pass most swiftly from point to point instead of smouldering. No sooner do we bring a flame to something flammable than it spreads - even as its conductors are already charring and curling up. Let us congratulate ourselves for remaking the transport of ideas. And for this new refrain: What matters is what's on fire. Through the prism of criticism, the modalities of thinking form a spectrum: on one end, systematic exposition, on the other, the fragment. It is the latter, fragmentary approach that distinguishes MATCHES-an investigation that does not focus on a single theme developed in all its aspects but, rather, on a constellation of themes in art, literature, philosophy, science, social and political thought, as well as the human in relation to history and nature. Chrostowska pursues here in performative fashion her research into the history of critique from the Enlightenment onward. Her choice of the fragment-in the tradition of writing represented by Gracián, Chamfort, Lichtenberg, and, closer to us, Nietzsche, Adorno, and Benjamin-does not, however, stem from an attempt to comprehend the contemporary world, which can only be done after the fact. Instead, served by an expressive and incisive style, Matches foregrounds the necessary elements for a critique of our time, capturing them in their contradictory and complementary relations. It situates itself under the sign of the future, reviving the spirit of utopia, reminding us that the last word need not belong to the present.
