Thank you for reading **Jee Main Result 2014 Paper 2**. Maybe you have knowledge that, people have look numerous times for their favorite books like this Jee Main Result 2014 Paper 2, but end up in harmful downloads.

Rather than enjoying a good book with a cup of tea in the afternoon, instead they cope with some harmful bugs inside their desktop computer.

Jee Main Result 2014 Paper 2 is available in our digital library an online access to it is set as public so you can get it instantly.

Our book servers spans in multiple countries, allowing you to get the most less latency time to download any of our books like this one.

Kindly say, the Jee Main Result 2014 Paper 2 is universally compatible with any devices to read

Handbook of Focal Therapy for Prostate and Renal Cancer Feb 12 2021 Provides a comprehensive, timely review of targeted ablation methods to treat prostate and renal cancers. It describes the most effective techniques in current practice, with discussion of the selection criteria, ablation technologies and their limitations, and advice on the management of common side effects.

Handbook on Cohesion Policy in the EU Mar 16 2021 This Handbook covers all major aspects of EU Cohesion policy, one of the most significant areas of intervention of the European Union. Over five parts, It discusses this policy's history and governing principles; the theoretical approaches from which it can be assessed; the inter-institutional and multi-level dynamics that it tends to elicit; its practical implementation and impact on EU member states; its interactions with other EU policies and strategies; and the cognitive maps and narratives with which it can be associated. An absolute must for all students of the EU.

Economic Survey of Latin America and the Caribbean 2017 Apr 04 2020 The 2017 edition of the Economic Survey of Latin America and the Caribbean has three parts. Part I outlines the region's economic performance in 2016 and analyses trends in the early months of 2017, as well as the outlook for the rest of the year. It examines external and domestic factors that have influenced the region's economic performance and draws attention to macroeconomic policy challenges. Part II analyses the characteristics of the current economic cycle in the region (2009-2016) and contrasts it with the two preceding cycles (1990-2001 and 2002-2008). It also identifies and attempts to explain some of the determinants of the cycle and outlines possible strategies for regaining growth. Part III contains notes relating to the economic performance of countries of the region.

Integrated Primary and Behavioral Care May 06 2020 This timely analysis spotlights the concepts and possibilities of the Patient-Centered Medical Home for bringing mental health and other specialties into primary care. Overview chapters present the Patient-Centered Medical Home model, emphasizing how such systems are organized to solve widespread problems with accessibility, affordability, efficiency, and safety. Practitioner roles, boundaries, and opportunities plus applications are clarified, as well as staffing, financial, and technological challenges. And the section on applications describe care models for special populations, such as comprehensive services to the seriously mentally ill and behavioral services to patients with chronic health conditions. Included in the coverage: Integrated care and specialty behavioral health care in the patient-centered medical home. Training the behavioral health workforce for the patient-centered medical home. The importance of stepped care protocols for the redesign of behavioral health care in patient-centered medical homes. Depression management in the medical home. Treating obesity in a primary care setting. Integrating behavioral

health in the pediatric medical home. For health and clinical psychologists, primary care and family physicians, and public health professionals, Integrated Primary and Behavioral Care represents the potential for an exciting new frontier in primary care reform.

The Oxford Handbook of the Economy of Cameroon Mar 04 2020 Cameroon's suboptimal economic experience since independence (1960) sheds light on broader issues of Africa's development narrative, and provides valuable economic and policy knowledge. While Cameroon's large informal economy is diverse and resilient and rooted in old business traditions, its formal economy has exhibited low productivity and employment growth for over 60 years. This has brought anger, disappointment, and violent conflict in several regions of the country. The Oxford Handbook of the Economy of Cameroon examines the reasons of Cameroon's unsatisfactory economic performance and draws lessons from successful development experience to help tackle these issues. The Handbook provides a critical assessment of the history, patterns, and strategies of economic development in Cameroon, and outlines new approaches to economic enquiry for prosperity and social change. Through Cameroon's governance story, the handbook analyzes the evolving conceptions of economic policy, takes stock of intellectual progress, documents the challenges of implementation, and outlines the intellectual and policy agenda ahead. For a developing country increases in per capita income arise from advances in technology arise from closing the knowledge and technology gap with those at the frontier. And within any country (especially one like Cameroon), there is enormous scope for productivity improvement simply by closing the gap between best practices and average practices. Standards of living can therefore be improved through the implementation of pertinent learning strategies. In this Oxford Handbook of the Economy of Cameroon, an international team of leading development economists and researchers address the wide range of issues facing Cameroon and provide guiding principles on how best the country (and other developing nations) could move human, capital, and financial resources from low- to high-productivity sectors in a constantly changing global economy.

Federal Register Jul 28 2019

Integral Green Slovenia Apr 28 2022 Ronnie Lessem and Alexander Schieffer's Integral Green Society and Economy series has three overarching aims. The first is to link together two major movements of our time, one philosophical, the other practical. The philosophical movement is towards what many today are calling an 'integral' age, while the practical is the 'green' movement, duly aligned with that of sustainable development. The second is to blend together elements of nature and community, culture and spirituality, science and technology, politics and economics, thus serving to bring about an 'integral green' vision, albeit with a focus on business and economics. As such, the authors transcend the limitations to sustainable development and

environmental economics, which are overly ecological, if not also technological, in orientation, and exclude social and cultural elements. Thirdly, this particular volume, with Darja Piciga, focuses specifically on Slovenia, as well as on Europe generally, drawing on the particular issues and capacities that this country and continent represents, particularly for sustainable development and social knowledge-based economy. The emphasis on Slovenia arose, not only because it lies at the heart of Europe, but because a specific movement for an Integral Green Slovenian Society and Economy, has been co-evolved there, by the three editors in conjunction with Slovene organisations, communities and movements, with a view to integrating existing and emerging knowledge resources, initiatives and practices into a model, as an alternative to austerity, for Slovenia and other European countries.

ECRM2014-Proceedings of the 13th European Conference on Research Methodology for Business and Management Studies Oct 03 2022

Communities in Action May 30 2022 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Epidemiology and Control of Notifiable Animal Diseases Apr 16 2021 Surveillance, early detection, control and eradication of notifiable animal diseases is of critical importance for countries in order to maintain or improve their animal health status. This requires the collaboration of all stakeholders involved including animal health authorities, livestock industry and veterinary research institutions among others. Prevention, control and eradication programs must take into account the characteristics of the host (including potential reservoirs), the pathogen (transmissibility, virulence...) and the environment (temperature, animal density...) but also the socio-economic context in which they have to be implemented (highly influenced by funding availability), while at the same time guaranteeing compliance with international trade regulations. This has led to the adoption of a wide range of approaches to address the risk posed by specific pathogens in different countries, and at the same time similar strategies have yielded very different results in different regions. This Research Topic includes a variety of manuscripts focusing on different aspects of surveillance, control and eradication of diseases of critical importance for livestock, including cattle, swine and wildlife, in an attempt to provide an overview of the current situation in different countries.

Economics of Land Degradation and Improvement - A Global Assessment for Sustainable Development Aug 09 2020 This volume deals with land degradation, which is occurring in almost all terrestrial biomes and agro-ecologies, in both low and high income countries and is stretching to about 30% of the total global land area. About three billion people reside in these degraded lands. However, the impact of land degradation is especially severe on livelihoods of the poor who heavily depend on natural resources. The annual global cost of land degradation due to land use and cover change (LUCC) and lower cropland and rangeland productivity is estimated to be about 300 billion USD. Sub-Saharan Africa (SSA) accounts for the largest share (22%) of the total global cost of land degradation. Only about 38% of the cost of land degradation due to LUCC - which accounts for 78% of the US\$300 billion loss - is borne by land users and the remaining share (62%) is borne by consumers of ecosystem services off the farm. The results in this volume indicate that reversing land degradation trends makes both economic sense, and has multiple social and environmental benefits. On average, one US dollar investment into restoration of degraded land returns five US dollars. The findings of the country case studies call for increased investments into

the rehabilitation and restoration of degraded lands, including through such institutional and policy measures as strengthening community participation for sustainable land management, enhancing government effectiveness and rule of law, improving access to markets and rural services, and securing land tenure. The assessment in this volume has been conducted at a time when there is an elevated interest in private land investments and when global efforts to achieve sustainable development objectives have intensified. In this regard, the results of this volume can contribute significantly to the ongoing policy debate and efforts to design strategies for achieving sustainable development goals and related efforts to address land degradation and halt biodiversity loss.

United States Code Oct 11 2020 "The United States Code is the official codification of the general and permanent laws of the United States of America. The Code was first published in 1926, and a new edition of the code has been published every six years since 1934. The 2012 edition of the Code incorporates laws enacted through the One Hundred Twelfth Congress, Second Session, the last of which was signed by the President on January 15, 2013. It does not include laws of the One Hundred Thirteenth Congress, First Session, enacted between January 2, 2013, the date it convened, and January 15, 2013. By statutory authority this edition may be cited "U.S.C. 2012 ed." As adopted in 1926, the Code established prima facie the general and permanent laws of the United States. The underlying statutes reprinted in the Code remained in effect and controlled over the Code in case of any discrepancy. In 1947, Congress began enacting individual titles of the Code into positive law. When a title is enacted into positive law, the underlying statutes are repealed and the title then becomes legal evidence of the law. Currently, 26 of the 51 titles in the Code have been so enacted. These are identified in the table of titles near the beginning of each volume. The Law Revision Counsel of the House of Representatives continues to prepare legislation pursuant to 2 U.S.C. 285b to enact the remainder of the Code, on a title-by-title basis, into positive law. The 2012 edition of the Code was prepared and published under the supervision of Ralph V. Seep, Law Revision Counsel. Grateful acknowledgment is made of the contributions by all who helped in this work, particularly the staffs of the Office of the Law Revision Counsel and the Government Printing Office"--Preface.

Democracy in the Woods Feb 01 2020 How do societies negotiate the apparently competing agendas of environmental protection and social justice? Why do some countries perform much better than others on this front? *Democracy in the Woods* addresses these questions by examining land rights conflicts and the fate of forest-dependent peasants in the context of the different forest property regimes in India, Tanzania, and Mexico. These three countries are prominent in the scholarship and policy debates about national forest policies and land conflicts associated with international support for nature conservation. This unique comparative study of national forestland regimes challenges the received wisdom that redistributive policies necessarily undermine the goals of environmental protection. It shows instead that the form that national environmental protection efforts take - either inclusive (as in Mexico) or exclusive (as in Tanzania and, for the most part, in India) - depends on whether dominant political parties are compelled to create structures of political intermediation that channel peasant demands for forest and land rights into the policy process. This book offers three different tests of this theory of political origins of forestland regimes. First, it explains why it took the Indian political elites nearly sixty years to introduce meaningful reforms of the colonial-era forestland regimes. Second, it successfully explains the rather counterintuitive local outcomes of the programs for formalization of land rights in India, Tanzania, and Mexico. Third, it provides a coherent explanation of why each of these three countries proposes a significantly different distribution of the benefits of forest-based climate change mitigation programs being developed under the auspices of the United Nations. In its political analysis of the control over and the use of nature, this book opens up new avenues for reflecting on how legacies of the past and international interventions interject into domestic political processes to produce specific configurations of environmental protection and social justice. *Democracy in the Woods* offers a theoretically rigorous argument about why and in what specific ways politics determine the prospects of a socially just and environmentally secure world. *Included in the Studies in Comparative Energy and Environmental Politics Series

Handbook of Rural Aging May 18 2021 The Handbook of Rural Aging goes beyond the perspective of a narrow range of health professions, disciplines, and community services that serve older adults in rural America to encompass the full range of perspectives and issues impacting the communities in which rural older adults live. Touching on such topics as work and voluntarism, technology, transportation, housing, the environment, social participation, and the delivery of health and community services, this reference work addresses the full breadth and scope of factors impacting the lives of rural elders with contributions from recognized scholars, administrators, and researchers. This Handbook buttresses a widespread movement to garner more attention for rural America in policy matters and decisions, while also elevating awareness of the critical circumstances facing rural elders and those who serve them. Merging demographic, economic, social, cultural, health, environmental, and political perspectives, it will be an essential reference source for library professionals, researchers, educators, students, program and community administrators, and practitioners with a combined interest in rural issues and aging.

Colour and Light in the Ocean Jan 14 2021 CLEO publications in Frontiers in Marine Science Foreword Josef Aschbacher, Director of ESA's Earth Observation Programmes Satellite data have drastically changed the view we have of the oceans. Covering about 70% of Earth's surface, oceans play a unique role for our planet and for our life – but large areas remain unexplored and are difficult to reach. Since the 1980s, Earth-orbiting satellites have helped to observe what is happening at the ocean surface. Sensors like CZCS, AVHRR, SeaWiifs and MODIS provided the first ocean colour data from space. Starting in 2002, ESA's Medium Resolution Imaging Spectrometer (MERIS) on-board the environmental satellite Envisat, provided detailed information on phytoplankton biomass and concentrations of other matter in the global oceans. These satellite observations laid the groundwork for studying the marine environment and how it responds to climate change, and the research community has since delivered information on the variability of marine ecosystems. Part of this work is reflected in this stunning collection of peer-reviewed publications presented at the workshop, Colour and Light in the Ocean from Earth Observation (CLEO), held at ESA's ESRIN site in Frascati, Italy, on 6-8 September 2016. The event attracted more than 160 participants from all over the world, including remote sensing experts, marine ecosystem modelers, in-situ observers and users of Earth observation data. Scientifically, the meeting covered applications in climate studies over primary productivity and ocean dynamics, to pools of carbon and phytoplankton diversity at global and regional scales. It also demonstrated the potential of Earth observation and its contribution to modern oceanography. Looking to the future, new satellites developed by ESA under the coordination of the European Commission will further our scientific and operational observations of the seas. With Sentinel-3A in orbit and its twin Sentinel-3B following in 2017, there is a new category of data available for operational oceanographic applications and climate studies for years to come. These data are free and easy to access by anyone interested. Looking at the role of oceans in our daily lives, I am sure that this collection of scientific excellence will be valued by scientists of today and will inspire the next generation to carry these ideas into the future.

The Power of the Media in Health Communication Jun 30 2022 Health is a contested concept that has been defined in numerous ways. The media is extremely powerful in promoting health beliefs and in creating role models for contemporary people. The ways in which health is defined or understood can have wide-ranging implications and can have an impact on issues such as health promotion or health literacy. Health presentation in the media has a significant social impact because this type of message is important in changing people's beliefs, attitudes and behaviours relating to health and in promoting health-related knowledge among the target audience. The present volume provides an interdisciplinary and multicultural contemporary approach to the controversial link between medicine and media. The authors that have contributed to this volume analyse the media and medicine from different perspectives and different countries (USA, UK, Portugal, Turkey, Taiwan, Mexico, Estonia, Romania), thus offering a re-positioning of the study of media and medicine. The new perspectives offered by this volume will be of interest to any health communication or media studies student or academic since they bring to light new ideas, new methodologies and new results.

Empathic design as the basic element of product-service system implementation Aug 21 2021 Diploma Thesis from the year 2017 in the subject Design (Industry, Graphics, Fashion), grade: A (97), , course:

Fashion Design. Professional training, language: English, abstract: Work is devoted to the important problem of empathic design process as part of the product-service system and in particular methodology of empathic design process in context of low and middle income in Ukraine. Wide literature analysis as per product-service system and empathic design is conducted. As the result, way to implement product-service system was identified and detailed methodology of empathic design established. Following this, literature as per behavior of Ukrainian consumers, their social habits and financial capabilities is examined and as a consequence, client profile as per project is created. In the second section of the thesis, practical implementation of empathic design process is described. In particular, costumer directed research methods for information gathering and brief creation were applied. On the stage of concept generation modifications were proposed, which allow customer to choose from variety of designs and became active figure in design creation, instead of being passive consumer. After this, sample collection was developed and sample outfit with all styling detailing is realized in material. In the third section educational seminar as per topic of the research for bachelor students is designed. All components as per didactic plan of the lesson are included and actual scenario is proposed.

Being a Planner in Society Jul 08 2020 This timely book addresses what it is to be a planner in a changing world: a world in need of transformation in the way planning is done in order to tackle social problems and ecological crises. Nicholas Low argues for the need to revalue public planning, sensitive to the social context in which it takes place.

Knowledge and Practice of Menstrual Hygiene among Adolescent Female Students in Oforikrom Jun 26 2019 Examination Thesis from the year 2020 in the subject Health - Miscellaneous, , language: English, abstract: The objective of this study is to assess the knowledge and practice of menstrual hygiene among high school girls at Oforikrom, Kumasi. The issue of menstrual hygiene is inadequately acknowledged and has not received proper attention. Use of sanitary pads and washing the genital area are essential practices to keep the menstrual hygiene. Unhygienic menstrual practices can affect the health of the girls and there is an increased vulnerability to reproductive tract infections and pelvic inflammatory diseases and other complications. A school based cross-sectional study design was employed in the study. A multi stage sampling technique was used to select 200 female junior high school students. Data collection was carried out from the students in their schools and homes using a pre- tested structured questionnaire. The data were entered into a computer using Excel and then exported to SPSS for Windows version 22 for analysis. Bivariate and multivariate logistic regression analysis was done at 95 % confidence interval.

Governance for Structural Transformation in Africa Nov 11 2020 This book explores how better governance can help Africa to achieve structural transformation (understood to be the reallocation of factors of production across and within sectors to better support inclusive development), which history has shown to be key to sustained, inclusive growth. The book begins with a review of the existing literature on the links between governance and structural transformation and the success or otherwise of various sub regions in achieving structural transformation. It continues with a range of contributors addressing original empirical research on the relationships between different approaches to institutions and trade and industrial policies and structural transformation in Africa. The book makes recommendations for a new approach to governance in Africa that can deliver the structural transformation that the continent needs for Africans to enjoy shared prosperity, poverty reduction and development.

Reimagining Reference in the 21st Century Sep 21 2021 Libraries today provide a wider variety of services, collections, and tools than at any time in the past. This book explores how reference librarianship is changing to continue to help users find information they need in this shifting environment.

California's Fiscal Outlook Sep 09 2020

Minerals Yearbook Oct 30 2019 - Minerals Yearbook, 2014, V. 3: Area Reports: International: Asia and the Pacific. Volume III, Area Reports: International, is published as four separate reports. These regional reports contain the latest available minerals data on more than 180 foreign countries and discuss the importance of minerals to the economies of these nations and the United States. Each report begins with an overview of the region's mineral industries during the year. It continues with individual country chapters that examine the mining, refining, processing, and use of minerals in each country of the region and how each country's mineral industry relates to U.S. industry. Most

chapters include production tables and industry structure tables, information about Government policies and programs that affect the country's mineral industry, and an outlook section.

Review of the Risks Related to a Results-oriented Approach for EU Development and Cooperation Action Jul 20 2021 "In our review, we identified nine key risk areas related to a results-oriented approach for EU development and cooperation action. Our review showed that these risk areas had been correctly identified by the Commission. It also showed the interest in the Commission's initiatives to improve EU development and cooperation results. Nevertheless, further actions remain to be taken in order to make these initiatives fully effective. We formulate a number of recommendations in this regard."--Publisher's description.

Science Education in Countries Along the Belt & Road Jan 26 2022 This book aims to highlight science education in countries along the Belt and Road. It consists of 30 chapters divided into three main parts, namely Arab and African countries, Asian countries and European countries,. We invited science education experts from 29 "Belt and Road" countries to introduce the current status of science education in their countries and the new requirements with the rapid evolution of Information Technology. The major contributions of this book include: 1) Provide the current status of science education in countries along the Belt and Road as well as the requirement for developing and improving science education in these countries; 2) Discuss new insights of science education in future years; 3) Inspire stakeholders to take effective initiatives to develop science education in countries along the Belt and Road. .

Managerial Strategies for Business Sustainability During Turbulent Times Aug 01 2022 As the economy fluctuates, so does the need for resilient business practices. If organizations can remain strong and steady during difficult times, they will be more fruitful during successful periods as well. *Managerial Strategies for Business Sustainability During Turbulent Times* is a crucial resource that discusses successful methods and techniques for building sturdy company practices. Featuring pertinent topics such as sustainable supply chains, knowledge management, information sharing, and performance evaluations, this is an ideal scholarly reference source for CEOs, managers, business students, and researchers that would like to discover more unique and engaging ways to build a strong business foundation. **Behavioral Interactions, Markets, and Economic Dynamics** Jun 18 2021 This book collects important contributions in behavioral economics and related topics, mainly by Japanese researchers, to provide new perspectives for the future development of economics and behavioral economics. The volume focuses especially on economic studies that examine interactions of multiple agents and/or market phenomena by using behavioral economics models. Reflecting the diverse fields of the editors, the book captures broad influences of behavioral economics on various topics in economics. Those subjects include parental altruism, economic growth and development, the relative and permanent income hypotheses, wealth distribution, asset price bubbles, auctions, search, contracts, personnel management and market efficiency and anomalies in financial markets. The chapter authors have added newly written addenda to the original articles in which they address their own subsequent works, supplementary analyses, detailed information on the underlying data and/or recent literature surveys. This will help readers to further understand recent developments in behavioral economics and related research.

Fixing Inequality in Hong Kong Mar 28 2022 When discussing inequality and poverty in Hong Kong, scholars and politicians often focus on the failures of government policy and push for an increase in social welfare. Richard Wong argues in *Fixing Inequality in Hong Kong* that universal retirement support, minimum wage, and standard hours of work are of limited effect in shrinking the inequality gap. By comparing Hong Kong with Singapore, he points out that Hong Kong needs a new and long-term strategy on human resource policy. He recommends more investment in education, focusing on early education and immigration policy reforms to attract highly educated and skilled people to join the workforce. In analyzing what causes inequality, this book ties disparate issues together into a coherent framework, such as Hong Kong's aging population, lack of investment in human capital, and family breakdowns. Rising divorce rates among low-income households have worsened the housing shortage, driving rents and property prices upwards. Housing problems have created a bigger gap between those who own housing and have the ability to invest in their children's human capital and those who

cannot, thus adversely impacting intergenerational upward mobility. This is the third of Richard Wong's collections of articles on society and economy in Hong Kong. *Diversity and Occasional Anarchy and Hong Kong Land for Hong Kong People*, published by Hong Kong University Press in 2013 and 2015 respectively, discuss growing economic and social contradictions in Hong Kong and current housing problems and their solutions.

Main results and metadata by country (2006-2015) Nov 04 2022 At the end of each round, the FAO Statistics Division reviews and assesses national census practices, methodologies and results, and summarizes the findings in methodological publications, under the Statistical Development Series (SDS). The SDS 17, i.e. this first publication, is a compendium of reviews of country agricultural censuses conducted during the WCA 2010 round (which covers the period 2006-2015) and their main results. This publication includes detailed metadata on agricultural censuses conducted by different countries. Apart from providing information on historical background, legal, institutional frameworks and international collaboration, the publication also provides an overview of the census staff, reference and enumeration periods, scope and coverage, methodological modalities, frame, data collection methods, questionnaires used, new technology used, data processing and archiving, and census data quality and dissemination. The metadata reviews are complemented by tables with main results on key structural characteristics, such as number of holdings, total area of holdings, area irrigated, machinery, gender, and sex of holders, number of household members, farm labor, livestock, and crop areas. This review of the WCA 2010 round is intended to serve as useful reference material for census planners and data users, providing valuable lessons for future censuses, which will ultimately lead to improved assessments of countries' agricultural sectors.

Portable Savings Account Feb 24 2022 Portable savings account is designed and developed by Varma for new banking system in order to expand it to the ultimate level. This portable bank account can be shifted from any bank to any bank at any time. It is multipurpose savings account with permanent account number

Kurukshetra Dec 13 2020

Commutative Algebra and Noncommutative Algebraic Geometry Nov 23 2021 This book surveys fundamental current topics in these two areas of research, emphasising the lively interaction between them. Volume 2 focuses on the most recent research.

Integrating Sustainability Thinking in Science and Engineering Curricula Sep 02 2022 Including considerations of sustainability in universities' activities has long since become mainstream. However, there is still much to be done with regard to the full integration of sustainability thinking into science and engineering curricula. Among the problems that hinder progress in this field, the lack of sound information on how to actually implement it is prominent. Created in order to address this need, this book presents a wealth of information on innovative approaches, methods and tools that may be helpful in translating sustainability principles into practice.

Neuromanagement and Neuromarketing Jun 06 2020

Technical Abstract Bulletin Aug 28 2019

Global Food Security and Development Aid Sep 29 2019 At the global level, international actors have repeatedly expressed their desire to end hunger and food insecurity. However, food insecurity has persisted. More analysis is hence needed on the link between continuously high levels of global food insecurity and the ever increasing flow of development aid. *Global Food Security and Development Aid* investigates the impact that development aid has had on food security in developing countries and includes international case studies on Peru, Ethiopia, India and Vietnam. It examines the effect of development aid in general and the impact of aid divided into different categories based on donor, mechanism and sector to which it is provided. In each examined relationship between aid and food security, particular attention is paid to the potentially intervening role played by the quality of national and/or local governance. The book makes policy recommendations, most importantly that donors should take greater care in considering which types of aid are suitable to which specific countries, localities, and development goals, and account for expected developments in the complex relationship between aid, food security, and governance. This book will be of considerable interest to students, researchers and policy-makers in the areas of development aid and food security.

The American Engineer Dec 01 2019
