An Evidence-based Guide to College and University Teaching Aug 06 2020 What makes a good college teacher? This book provides an evidence-based answer to that question by presenting a set of "model teaching characteristics" that define what makes a good college teacher. Based on six fundamental areas of teaching competency known as Model Teaching Characteristics outlined by The Society for the Teaching of Psychology (STP), this book describes how college faculty from all disciplines and at all levels of experience can use these characteristics to evaluate, guide, and improve their teaching. Evidence based research supports the inclusion of each characteristic, each of which is illustrated through example, to help readers master the skills. Readers learn to evaluate their teaching abilities by providing guidance on what to document and how to accumulate and organize the evidence. Two introductory chapters outline the model teaching characteristics followed by six chapters, each devoted to one of the characteristics: training, instructional methods, course content, assessment, syllabus construction, and student evaluations. The book: -Features in each chapter self-evaluation surveys that help readers identify gaps between the model characteristics and their own teaching, case studies that illustrate common teaching problems, discussion questions that encourage critical thinking, and additional readings for further exploration. -Discusses the need to master teaching skills such as collaborative learning, listening, and using technology as well as discipline-specific knowledge. -Advocates for the use of student-learning outcomes to help teachers better evaluate student performance based on their achievement of specific learning goals. -Argues for the development of learning objectives that reflect the core of the discipline's theories and applications, strengthen basic liberal arts skills, and infuse ethical and diversity issues. -Discusses how to solicit student feedback and utilize these evaluations to improve teaching. Intended for professional development or teacher training courses offered in masters and doctoral programs in colleges and universities, this book is also an invaluable resource for faculty development centers, college and university administrators, and college teachers of all levels and disciplines, from novice to the most experienced, interested in becoming more effective

teachers.

[A Guide to Teaching in the Active Learning Classroom](#) Jan 23 2022 While Active Learning Classrooms, or ALCs, offer rich new environments for learning, they present many new challenges to faculty because, among other things, they eliminate the room's central focal point and disrupt the conventional seating plan to which faculty and students have become accustomed. The importance of learning how to use these classrooms well and to capitalize on their special features is paramount. The potential they represent can be realized only when they facilitate improved learning outcomes and engage students in the learning process in a manner different from traditional classrooms and lecture halls. This book provides an introduction to ALCs, briefly covering their history and then synthesizing the research on these spaces to provide faculty with empirically based, practical guidance on how to use these unfamiliar spaces effectively. Among the questions this book addresses are: • How can instructors mitigate the apparent lack of a central focal point in the space? • What types of learning activities work well in the ALCs and take advantage of the affordances of the room? • How can teachers address familiar classroom-management challenges in these unfamiliar spaces? • If assessment and rapid feedback are critical in active learning, how do they work in a room filled with circular tables and no central focus point? • How do instructors balance group learning with the needs of the larger class? • How can students be held accountable when many will necessarily have their backs facing the instructor? • How can instructors evaluate the effectiveness of their teaching in these spaces? This book is intended for faculty preparing to teach in or already working in this new classroom environment; for administrators planning to create ALCs or experimenting with provisionally designed rooms; and for faculty developers helping teachers transition to using these new spaces.
