[Rebuilding Sustainable Communities in Iraq](#) May 06 2020 The scene in Iraq is most troubling; and further failure therein – especially failure in sustainable reconstruction – will compound the tragedy and bring grievous harm to too many: in Iraq, the United States, the Middle East and the Western world. Yet, the current efforts at reconstruction cannot succeed -- as we seem to be making many of the same mistakes that were made post-invasion. Simply put, a national occupying power cannot reconstruct a massive societal vacuum by working only top down. Reconstruction is not the simple reversal of destruction. Sustainability requires serious localized reconstitution of localized community infrastructure. Accordingly, in order to explore how Iraqi communities could be rebuilt in a manner that promotes social justice, economic and political sustainability, and the full participation of all stakeholders, the Center for Rebuilding Sustainable Communities after Disasters at the University of Massachusetts at Boston, USA, hosted a four-day international conference of Iraqi and international scholars and practitioners in July 2007. This volume collects some of the papers that were presented at the conference. Amongst the topics that the contributing authors have explored are the following: the role of organizations and institutions in defining strategies for sustainable rebuilding of community; rebuilding the Iraqi Oil Industry; and, successful project strategies in Iraq's Kurdistan region. The book concludes with a presentation of a number of international perspectives and their lessons for Iraq. These studies spring from Afghanistan, the United States of America and Africa. **Naked and Transparent** Sep 21 2021 Do you feel broken or lost? **We Fed an Island** Jul 28 2019 FOREWORD BY LIN-MANUEL MIRANDA AND LUIS A. MIRANDA, JR. The true story of how a group of chefs fed hundreds of thousands of hungry Americans after Hurricane Maria and touched the hearts of many more Chef José Andrés arrived in Puerto Rico four days after Hurricane Maria ripped through the island. The economy was destroyed and for most people there was no clean water, no food, no power, no gas, and no way to communicate with the outside world. Andrés addressed the humanitarian crisis the only way he knew how: by feeding people, one hot meal at a time. From serving sancocho with his friend José Enrique at Enrique's ravaged restaurant in San Juan to eventually cooking 100,000 meals a day at more than a dozen kitchens across the island, Andrés and his team fed hundreds of thousands of people, including with massive paellas made to serve thousands of people alone.. At the same time, they also confronted a crisis with deep roots, as well as the broken and wasteful system that helps keep some of the biggest charities and NGOs in business. Based on Andrés's insider's take as well as on meetings, messages, and conversations he had while in Puerto Rico, We Fed an Island movingly describes how a network of community kitchens activated real change and tells an extraordinary story of hope in the face of disasters both natural and man-made, offering suggestions for how to address a crisis like this in the future. Beyond that, a portion of the proceeds from the book will be donated to the Chef Relief Network of World Central Kitchen for efforts in Puerto Rico and beyond.

**Rebuilding Urban Places After Disaster** Oct 23 2021 Disasters—natural ones, such as hurricanes, floods, or earthquakes, and unnatural ones such as terrorist attacks—are part of the American experience in the twenty-first century. The challenges of preparing for these events, withstanding their impact, and rebuilding communities afterward require strategic responses from different levels of government in partnership with the private sector and in accordance with the public will. Disasters have a disproportionate effect on urban places. Dense by definition, cities and their environs suffer great damage to their complex, interdependent social, environmental, and economic systems. Social and medical services collapse. Long-standing problems in educational access and quality become especially acute. Local economies cease to function. Cultural resources disappear. The plight of New Orleans and several smaller Gulf Coast cities exemplifies this phenomenon. This volume examines the rebuilding of cities and their environs after a disaster and focuses on four major issues: making cities less vulnerable to disaster, reestablishing economic viability, responding to the permanent needs of the displaced, and recreating a sense of place. Success in these areas requires that priorities be set cooperatively, and this goal poses significant challenges for rebuilding efforts in a democratic, market-based society. Who sets priorities and how? Can participatory decision-making be organized under conditions requiring focused, strategic choices? How do issues of race and class intersect with these priorities? Should the purpose of rebuilding be restoration or reformation? Contributors address these and other questions related to environmental conditions, economic imperatives, social welfare concerns, and issues of planning and design in light of the lessons to be drawn from Hurricane Katrina.

**Power at Ground Zero** Jan 26 2022 The destruction of the World Trade Center complex on 9/11 set in motion a chain of events that fundamentally transformed both the United States and the wider world. War has raged in the Middle East for a decade and a half, and Americans have become accustomed to surveillance, enhanced security, and periodic terrorist attacks. But the symbolic locus of the post-9/11 world has always been "Ground Zero"—the sixteen acres in Manhattan's financial district where the twin towers collapsed. While idealism dominated in the initial rebuilding phase, interest-group trench warfare soon ensued. Myriad battles involving all of the interests with a stake in that space—real estate interests, victims' families, politicians, the Port Authority of New York and New Jersey, the federal government, community groups, architectural firms, and a panoply of ambitious entrepreneurs grasping for pieces of the pie—raged for over a decade, and nearly fifteen years later there are still loose ends that need resolution. In *Power at Ground Zero*, Lynne Sagalyn offers the definitive account of one of the greatest reconstruction projects in modern world history. Sagalyn is America's most eminent scholar of major urban reconstruction projects, and this is the culmination of over a decade of research. Both epic in scope and granular in detail, this is at base a classic New York story. Sagalyn has an extraordinary command over all of the actors and moving parts involved in the drama: the long parade of New York and New Jersey governors involved in the project, Mayor Michael Bloomberg, various Port Authority leaders, the ubiquitous real estate magnate Larry Silverstein, and architectural superstars like Santiago Calatrava and Daniel Libeskind. As she shows, political competition at the local, state, regional, and federal level along with vast sums of money drove every aspect of the planning process. But the reconstruction project was always about more than complex real estate deals and jockeying among local politicians. The symbolism of the reconstruction extended far beyond New York and was freighted with the twin tasks of symbolizing American resilience and projecting American power. As a result, every aspect was contested. As Sagalyn points out, while modern city building is often dismissed as cold-hearted and detached from meaning, the opposite was true at Ground Zero. Virtually every action was infused with symbolic significance and needed to be debated. The emotional dimension of 9/11 made this large-scale rebuilding effort unique; it supercharged the complexity of the rebuilding process with both sanctity and a truly unique politics. Covering all of this and more, *Power at Ground Zero* is sure to stand as the most important book ever written on the aftermath of arguably the most significant isolated event in the post-Cold War era.

**Rebuilding the Brand** Jan 02 2020 What happens when a company's brand needs more than a face-lift? Author Clyde Fessler, former Harley-Davidson vice president of marketing and business development, takes you along for a ride through a complete brand overhaul. By examining the core principles of brand identity, development, and extension, Fessler shows how these ideas—paired with his unique “problems are in the office, solutions are in the field” leadership style—helped reestablish Harley as one of the most enduring and identifiable brands in the world. In *Rebuilding the Brand*, you will: •Explore the six key components of building and maintaining a powerful brand: brand experience, brand extension, brand association, brand consistency, brand welfare, and brand team. •Discover the power of “turning left” when the competition turns right and why breaking away from the pack will keep you at the center of customers' attention. •Learn how the traction of turning negatives into positives will help you gain powerful marketing momentum.

**Ed Koch and the Rebuilding of New York City** Nov 04 2022 In 1978, Ed Koch assumed control of a city plagued by filth, crime, bankruptcy, and racial tensions. By the end of his mayoral run in 1989 and despite the Wall Street crash of 1987, his administration had begun rebuilding neighborhoods and infrastructure. Unlike many American cities, Koch's New York was growing, not shrinking. Gentrification brought new businesses to neglected corners and converted low-end rental housing to coops and condos. Nevertheless, not all the changes were positive—AIDS, crime, homelessness, and violent racial conflict increased, marking a time of great, if somewhat uneven, transition. For better or worse, Koch's efforts convinced many New Yorkers to embrace a new political order subsidizing business, particularly finance, insurance, and real estate, and privatizing public space. Each phase of the city's recovery required a difficult choice between moneyed interests and social services, forcing Koch to be both a moderate and a pragmatist as he tried to mitigate growing economic inequality. Throughout, Koch's rough rhetoric (attacking his opponents as "crazy," "wackos," and "radicals") prompted charges of being racially divisive. The first book to recast Koch's legacy through personal and mayoral papers, authorized interviews, and oral histories, this volume plots a history of New York City through two rarely studied yet crucial decades: the bankruptcy of the 1970s and the recovery and crash of the 1980s.

**Rebuilding the Inner City** Jan 14 2021 Neighborhood-based initiatives -ranging from settlement houses in the nineteenth century to the Community Action and Model Cities program of the Great Society to the Empowerment and Enterprise Zones of the 1990s -have been called on to help solve a variety of poverty-related problems. This book examines the history of these initiatives.

*The Edge Becomes the Center* Aug 21 2021 If you live in a city—and every year, more and more Americans do—you’ve seen firsthand how gentrification has transformed our surroundings, altering the way cities look, feel, cost, and even smell. Over the last few years, journalists, policymakers, critics, and historians have all tried to explain just what it is that happens when new money and new residents flow into established neighborhoods, yet we’ve had very little access to the human side of the gentrification phenomenon. *The Edge Becomes the Center* captures the stories of the many kinds of people—brokers, buyers, sellers, renters, landlords, artists, contractors, politicians, and everyone in between—who are shaping and being shaped by the new New York City. In this extraordinary oral history, DW Gibson takes gentrification out of the op-ed columns and textbooks and brings it to life, showing us what urban change looks and feels like by exposing us to the voices of the people living through it. Drawing on the plainspoken, casually authoritative tradition of Jane Jacobs and Studs Terkel, *The Edge Becomes the Center* is an inviting and essential portrait of the way we live now.

*Rebuilding Attachments with Traumatized Children* Jul 20 2021 Learn to build the trust you need to help children in crisis! *Rebuilding Attachments with Traumatized Children: Healing from Losses, Violence, Abuse, and Neglect* is a therapeutic guide to helping troubled children move beyond the traumatic experiences that haunt them. Author Dr. Richard Kagan, Director of Psychological Services for Parsons Child and Family Center in Albany, New York, presents comprehensive information on how to understand—and surmount—the impact of loss, neglect, separation, and violence on children’s development, how to discover and foster strengths in children and their families, and how to rebuild connections and hope for children who are at risk of harm to themselves and others. This unique book is designed to be used in tandem with *Real Life Heroes: A Life Storybook for Children* (Haworth), an innovative workbook that helps children develop the self-esteem they need to overcome the worries and fears of their past through a creative arts approach that fosters positive values and a sense of pride. *Rebuilding Attachments with Traumatized Children* helps children move from negative or suppressed memories to a more positive perspective, not by denying hardships, but by drawing strength from the supportive people in their lives. Practitioners can use the book as a framework and detailed guide to assessment, engagement, development of service plans, and implementation of attachment and trauma therapy. The book is a comprehensive model for working to build the trust necessary before other trauma therapy approaches can be successfully initiated. Topics examined in *Rebuilding Attachments with Traumatized Children* include: attachment theory and research types of attachment problems PTSD behaviors permanency work with children in placement ADHD, bipolar, and RAD cognitive behavioral therapies storytelling therapies the myth of perfection neuropsychological patterns and much more! *Rebuilding Attachments with Traumatized Children* is a rich resource for practitioners, academics, parents, adoptive parents, foster parents, grandparents, and anyone working to show troubled children how to learn from the past, resolve problems in the present, and build a better future.

*Once More to the Sky* May 30 2022 In late 2014, One World Trade Center-- or the Freedom Tower-- opened for business. It had taken nearly ten years, cost roughly four billion dollars, and had suffered setbacks that would have most likely scuttled any other project. Today it serves as a reminder of what America is capable of when we put aside our differences and pull together for a common cause. Raab's articles appeared in the pages of *Esquire* between 2005 and 2015, and here are accompanied by many never-before-seen photos. -- adapted from back cover.

*Rebuilt* Apr 04 2020 Drawing on the wisdom gleaned from thriving mega-churches and innovative business leaders while anchoring their vision in the Eucharistic center of Catholic faith, Fr. Michael White and lay associate Tom Corcoran present the compelling and inspiring story to how they brought their parish back to life. *Rebuilt: Awakening the Faithful, Reaching the Lost, and Making Church Matter* is a story of stopping everything and changing focus. When their parish reached a breaking point, White and Corcoran asked themselves how they could make the Church matter to Catholics, and they realized the answer was at the heart of the Gospel. Their faithful response not only tripled their weekend mass attendance, but also yielded increased giving, flourishing ministries, and a vibrant, solidly Catholic spiritual revival. White and Corcoran invite all Catholic leaders to share the vision, borrow their strategies, and rebuild their own parishes. They offer a wealth of guidance for anyone with the courage to hear them.

*Greater than Ever* Jun 30 2022 The former deputy mayor of New York City tells the story of the city's comeback after 9/11, offering lessons in resiliency under the most trying of circumstances, and a model for the rejuvenation of any city. Deputy Mayor Daniel L. Doctoroff led New York's dramatic and unexpected economic resurgence after the September 11 terrorist attacks. With Mayor Michael Bloomberg, he developed a remarkably ambitious five-borough economic development plan to not only recover from the attacks but to completely transform New York's economy: New neighborhoods were created. Hundreds of thousands of jobs were generated. The largest municipal affordable housing plan in American history was completed. Ground Zero was rebuilt. And New York adopted a pathbreaking sustainability plan. None of this was straightforward. New York has some of the most entrenched financial and political interests anywhere, and it has a population that is quick to let its public officials know exactly what is on its mind. Doctoroff's plans for a New York Olympic Games and a stadium on the West Side crashed and burned, but phoenix-like he engineered the transformation of the city anyway. *Greater than Ever* is a bracing adventure--when can-do attitude dove headlong into New York's unique realpolitik of "fuggedaboutit"--during which the city was changed for the better.

*Rebuilding Milo* Dec 01 2019 Every athlete who spends time in the weight room eventually deals with pain/injury that leaves them frustrated and unable to reach their highest potential. Every athlete ought to have the ability to take the first steps at addressing these minor injuries. They shouldn't have to wait weeks for a doctor's appointment, only to be prescribed pain medications and told to "take two weeks off lifting" or, even worse, to "stop lifting so heavy." Dr. Aaron Horschig knows your pain and frustration. He's been there. For over a decade, Dr. Horschig has been a competitive weightlifter, and he understands how discouraging it is to tweak your back three weeks out from a huge weightlifting competition, to have knee pain limit your ability to squat heavy for weeks, and to suffer from chronic shoulder issues that keep you from reaching your goals. *Rebuilding Milo* is the culmination of Dr. Horschig's life's work as a sports physical therapist, certified strength and conditioning specialist, and Olympic weightlifting coach. It contains all of the knowledge he has amassed over the past decade while helping some of the best athletes in the world. Now he wants to share that knowledge with you. This book, designed by a strength athlete for anyone who spends time in the weight room, is the solution to your struggles with injury and pain. It walks you through simple tests and screens to uncover the movement problem at the root of your pain. After discovering the cause of your injury, you'll be able to create an individualized rehab program as laid out in this book. Finally, you'll be on the right path to eliminate your pain and return to the activities you love.

**Rebuilding Fukushima** Feb 12 2021 Five years after the one of the worst nuclear accidents in history, Fukushima now only occasionally headlines national and international media. However, the disaster is far from over, as evidenced by a hundred thousand people from Fukushima still in the state of evacuation, rising levels of radiation in streams and rivers, and failing attempts to control the leakage of radioactive materials at the Fukushima Daiichi Nuclear Power Plant. Despite these dismal conditions, efforts to recover and rebuild livelihoods in the afflicted regions of Fukushima did start immediately after the outset of the accident. Rebuilding Fukushima gives an account of how citizens, local governments, and businesses responded to and coped with the crisis of Fukushima. It addresses principles to guide reconstruction and international policy environments in which the current disaster is situated. It explores how reconstruction is articulated and experienced at different spatial scales, ranging from individuals to communities and municipalities, and details recovery efforts, achievements, and challenges in the realms of public transportation, agriculture and food production, manufacturing industries, retail sectors, and renewable-energy industries. This book also critically investigates the nature of the current reconstruction policy schemes, and seeks to articulate what may be required in order to achieve more sustainable and equitable (re)development in afflicted regions and other nuclear host regions. Drawing on extensive fieldwork and local surveys, this volume is one of the first books in English that captures the knowledge and insights of native Japanese social scientists who dealt with the complexities of nuclear disaster on a day-to-day basis. It will be of great interest to students and scholars of disaster-management studies and nuclear policy.

**NOT "Just Friends"** Apr 16 2021 One of the world's leading experts on infidelity provides a step-by-step guide through the process of infidelity—from suspicion and revelation to healing, and provides profound, practical guidance to prevent infidelity and, if it happens, recover and heal from it. You're right to be cautious when you hear these words: "I'm telling you, we're just friends." Good people in good marriages are having affairs. The workplace and the Internet have become fertile breeding grounds for "friendships" that can slowly and insidiously turn into love affairs. Yet you can protect your relationship from emotional or sexual betrayal by recognizing the red flags that mark the stages of slipping into an improper, dangerous intimacy that can threaten your marriage.

Rebuilding Your Broken World Sep 29 2019 What happens when your ideals and desires, plans and strategies, all go awry? From what sources might one find the resolve to begin a rebuilding process? "The fact is," writes Gordon MacDonald in Rebuilding Your Broken World, "the God of the Bible is a God of the rebuilding process. And not enough broken people know that." No stranger himself to brokenness, Gordon MacDonald draws from personal experience and discusses the likely sources of pain, the humiliation, and the long- and short-range consequences of a broken personal world. And he offers encouraging answers to the questions everyone asks when their worlds fall apart: Is there a way back?

Rebuilding Community May 18 2021 Our poorest urban neighbourhoods experience economic and social difficulties that uniquely affect the lives of those who live there. This volume examines the policies and initiatives now underway on both sides of the Atlantic to revitalize those areas. With contributors from the US, France and the UK the volume explains the nature of specific community building programmes and explores critical issues such as the role of partnerships and the importance of race and gender in urban regeneration.

Robert Moses and the Modern City Dec 13 2020 A fresh look at the greatest builder in the history of New York City and one of its most controversial figures. "We are rebuilding New York, not dispersing and abandoning it": Robert Moses saw himself on a rescue mission to save the city from obsolescence, decentralization, and decline. His vast building program aimed to modernize urban infrastructure, expand the public realm with extensive recreational facilities, remove blight, and make the city more livable for the middle class. This book offers a fresh look at the physical transformation of New York during Moses's nearly forty-year reign over city building from 1934 to 1968. It is hard to imagine that anyone will ever have the same impact on New York as did Robert Moses. In his various roles in city and state government, he reshaped the fabric of the city, and his legacy continues to touch the lives of all New Yorkers. Revered for most of his life, he is now one of the most controversial figures in the city's history. Robert Moses and the Modern City is the first major publication devoted to him since Robert Caro's damning 1974 biography, The Power Broker: Robert Moses and the Fall of New York. In these pages eight short essays by leading scholars of urban history provide a revised perspective; stunning new photographs offer the first visual record of Moses's far-reaching building program as it stands today; and a comprehensive catalog of his works is illustrated with a wealth of archival records: photographs of buildings, neighborhoods, and landscapes, of parks, pools, and playgrounds, of demolished neighborhoods and replacement housing and urban renewal projects, of bridges and highways; renderings of rejected designs and controversial projects that were defeated; and views of spectacular models that have not been seen since Moses made them for promotional purposes. Robert Moses and the Modern City captures research undertaken in the last three decades and will stimulate a new round of debate.

**Rebuilding War-Torn States** Jun 18 2021 Post-conflict economic reconstruction is a critical part of the political economy of peacetime and one of the most important challenges in any peace-building or state-building strategy. After wars end, countries must negotiate a multi-pronged transition to peace: Violence must give way to public security; lawlessness, political exclusion, and violation of human rights must give way to the rule of law and participatory government; ethnic, religious, ideological, or class/caste confrontation must give way to national reconciliation; and ravaged and mismanaged war economies must be reconstructed and transformed into functioning market economies that enable people to earn a decent living. Yet, how can these vitally important tasks each be successfully managed? How should we go about rehabilitating basic services and physical and human infrastructure? Which policies and institutions are necessary to reactivate the economy in the short run and ensure sustainable development in the long run? What steps should countries take to bring about national reconciliation and the consolidation of peace? In all of these cases, unless the political objectives of peacetime prevail at all times, peace will be ephemeral, while policies that pursue purely economic objectives can have tragic consequences. This book argues that any strategy for post-conflict economic reconstruction must be based on five premises and examines specific post-conflict reconstruction experiences to identify not only where these premises have been disregarded, but also where policies have worked, and the specific conditions that have influenced their success and failure.
