Picturing the Western Front Feb 11 2021 Between 1914 and 1918, military, press and amateur photographers produced thousands of pictures. Either classified in military archives specially created with this purpose in 1915, collected in personal albums or circulated in illustrated magazines, photographs were supposed to tell the story of the war. Picturing the Western Front argues that photographic practices also shaped combatants and civilians' war experiences. Doing photography (taking pictures, posing for them, exhibiting, cataloguing and looking at them) allowed combatants and civilians to make sense of what they were living through. Photography mattered because it enabled combatants and civilians to record events, establish or reinforce bonds with one another, represent bodies, place people and events in imaginative geographies and making things visible, while making others, such as suicide, invisible. Photographic practices became, thus, frames of experience.

The Smithsonian's History of America in 101 Objects Oct 10 2020 The Smithsonian Institution is America's largest, most important, and most beloved repository for the objects that define our common heritage. Now Under Secretary for Art, History, and Culture Richard Kurin, aided by a team of top Smithsonian curators and scholars, has assembled a literary exhibition of 101 objects from across the Smithsonian's museums that together offer a marvelous new perspective on the history of the United States. Ranging from the earliest years of the pre-Columbian continent to the digital age, and from the American Revolution to Vietnam, each entry pairs the fascinating history surrounding each object with the story of its creation or discovery and the place it has come to occupy in our national memory. Kurin sheds remarkable new light on objects we think we know well, from Lincoln's hat to Dorothy's ruby slippers and Julia Child's kitchen, including the often astonishing tales of how each made its way into the collections of the Smithsonian. Other objects will be eye-opening new discoveries for many, but no less evocative of the most poignant and important moments of the American experience. Some objects, such as Harriet Tubman's hymnal, Sitting Bull's ledger, Cesar Chavez's union jacket, and the Enola Gay bomber, tell difficult stories from the nation's history, and inspire controversies when exhibited at the Smithsonian. Others, from George Washington's sword to the space shuttle Discovery, celebrate the richness and vitality of the American spirit. In Kurin's hands, each object comes to vivid life, providing a tactile connection to American history. Beautifully designed and illustrated with color photographs throughout, *The Smithsonian's History of America in 101 Objects* is a rich and fascinating journey through America's collective memory, and a beautiful object in its own right.

The Amateur Photographer Jan 01 2020 The popular illustrated journal for all photographers devoted to the interests of photography and kindred arts and sciences.

A History of Photography in 50 Cameras Oct 22 2021 A History of Photography in 50 Cameras explores the 180-year story of perhaps the most widely used device ever built. It covers cameras in all forms, revealing the origins and development of each model and tracing the stories of the photographers who used and popularized them. Illustrated throughout with studio shots of all fifty cameras and a selection of iconic photographs made using them, it is the perfect companion guide for camera and photography enthusiasts alike. The cameras include: The Nikon F, the "hockey puck" that saved photographer Don McCullin's life when it stopped a sniper's bullet during the Vietnam War. Its indestructibility, reliability and interchangeable lenses made it a favored workhorse of photojournalists. The Leica M3-D was also favored by war photographers, including David Duncan Douglas, who used the camera during his coverage of the Korean and Vietnam Wars. In 2012, one of his four customized Leica cameras sold at auction for nearly \$2 million. A Speed Graphic was used to take Sam Shere's widely published photograph of the 1937 Hindenburg disaster, "the world's most famous news photograph ever taken." With few shots left and no time to get the camera to his eye, he shot his Pulitzer Prize-winning image "literally from the hip. It was over so fast there was nothing else to do." The camera phone has transformed picture-taking technology most profoundly since the invention of cameras. The "selfie" has become a new genre of photography practiced by everyone, and shared globally. This is an ideal book for camera collectors as well as anyone researching the history and art of photography.
