The All-or-Nothing Marriage Apr 16 2021 "After years of debate and inquiry, the key to a great marriage remained shrouded in mystery. Until

now...”—Carol Dweck, author of *Mindset: The New Psychology of Success* Eli J. Finkel's insightful and ground-breaking investigation of marriage clearly shows that the best marriages today are better than the best marriages of earlier eras. Indeed, they are the best marriages the world has ever known. He presents his findings here for the first time in this lucid, inspiring guide to modern marital bliss. *The All-or-Nothing Marriage* reverse engineers fulfilling marriages—from the “traditional” to the utterly nontraditional—and shows how any marriage can be better. The primary function of marriage from 1620 to 1850 was food, shelter, and protection from violence; from 1850 to 1965, the purpose revolved around love and companionship. But today, a new kind of marriage has emerged, one oriented toward self-discovery, self-esteem, and personal growth. Finkel combines cutting-edge scientific research with practical advice; he considers paths to better communication and responsiveness; he

Couples That Work Jul 28 2019 Finding fulfillment in both love and work isn't easy--but it's possible. The majority of couples today are dual-career couples. As anyone who's part of such a relationship knows, this presents big challenges: trying to raise kids and achieve career goals while caring for and supporting your partner can seem impossible. Yet most advice for dual-career couples fails, framing the challenges as a zero-sum game in which one partner's gain is the other's loss and solutions feel like sacrifices or unsatisfactory trade-offs. This book is different. In *Couples That Work*, INSEAD professor Jennifer Petriglieri rejects conventional, one-size-fits-all solutions and instead focuses on how dual-career couples can tackle and resolve the challenges they face throughout their lives--together. She identifies

three key phases of exploration and personal growth in every couple's work-life journey, showing how partners must navigate these together to strengthen their bond. Each phase is crystallized with a question: How can we make this work? The first phase focuses on the logistics of combining two busy lives and often involves the demands of young children. What do we really want? In the second phase, couples learn to navigate their midlife crises in ways that allow each partner to continue to feel happy and fulfilled. Who are we now? With careers winding down and kids grown up, this last phase offers new freedoms--and uncertainties. Based on a five-year research project, the book includes interviews with couples from over thirty countries--from executives to entrepreneurs and from twentysomething newlyweds to dual-career grandparents. Filled with vivid real-life stories, keen insights, and engaging exercises, *Couples That Work* will help couples develop their own unique answers to that most pressing question:

How can we successfully combine love and work?

Sandberg is chief operating officer of Facebook and coauthor of *Option B* with Adam Grant. Her talk, which has been viewed more than six million times, encouraged women to “sit at the table,” seek challenges, take risks, and pursue their goals with gusto. *Lean In* continues that conversation, combining personal anecdotes, hard data, and compelling research to change the conversation from what women can’t do to what they can. Sandberg provides practical advice on negotiation techniques, mentorship, and building a satisfying career. She describes specific steps women can take to combine professional

achievement with personal fulfillment, and demonstrates how men can benefit by supporting women both in the workplace and at home. Beyond Collaboration Overload Dec 13 2020

A plan for conquering collaborative overload to drive performance and innovation, reduce burnout, and enhance well-being. Most organizations have created always-on work contexts that are burning people out and hurting performance rather than delivering productivity, innovation and engagement. Collaborative work consumes 85% of employees' time and is drifting earlier into the morning, later into the night, and deeper into the weekend. The dilemma is that we all need to collaborate more to create effective organizations and vibrant careers for ourselves. But conventional wisdom on

teamwork and collaboration has created too much of the wrong kind of collaboration, which hurts our performance, health and overall well-being. In *Beyond Collaboration Overload*, Babson professor Rob Cross solves this paradox by showing how top performers who thrive at work collaborate in a more purposeful way that makes them 18-24% more efficient than their peers. Good collaborators are distinguished by the efficiency and intentionality of their collaboration—not the size of their network or the length of their workday. Through landmark research with more than 300 organizations, in-depth stories, and tools, *Beyond Collaboration Overload* will coach you to reclaim close to a day a week when you: Identify and challenge beliefs that lead you to collaborate too quickly Impose structure in your work to prevent unproductive collaboration Alter behaviors to create more efficient collaboration It then outlines how successful people invest this reclaimed time to: Cultivate a broad network—not a big one—for

innovation and scale Energize others—a strong predictor of high performance Connect with others to reduce micro-stressors and enhance physical and mental well-being Cross' framework provides relief from the definitive problem of our age—dysfunctional collaboration at the expense of our performance, health and overall well-being.

The Women of the Copper Country Jun 26 2019 From the bestselling and award-winning author of *The Sparrow* comes an inspiring historical novel about "America's Joan of Arc" Annie Clements—the courageous woman who started a rebellion by leading a strike against the largest copper mining company in the world. In July 1913, twenty-five-year-old Annie Clements had seen enough of the world to know that it was

unfair. She's spent her whole life in the copper-mining town of Calumet, Michigan where men risk their lives for meager salaries—and had barely enough to put food on the table and clothes on their backs. The women labor in the houses of the elite, and send their husbands and sons deep underground each day, dreading the fateful call of the company man telling them their loved ones aren't coming home. When Annie decides to stand up for herself, and the entire town of Calumet, nearly everyone believes she may have taken on more than she is prepared to handle. In Annie's hands lie the miners' fortunes and their health, her husband's wrath over her growing independence, and her own reputation as she faces the threat of prison and discovers a forbidden love. On her fierce quest for justice, Annie will discover just how much she is willing to sacrifice for her own independence and the families of Calumet. From one of the most versatile writers in contemporary fiction, this novel is an authentic

and moving historical portrait of the lives of the men and women of the early 20th century labor movement, and of a turbulent, violent political landscape that may feel startlingly relevant to today.

Partners In Passion Feb 12 2021 Most of us long for intimate relationships, and though texting and emailing may keep us superficially connected, it ultimately cannot create the kind of intimacy necessary to sustain a deep, fulfilling, and lasting partnership. With the divorce rate reaching a staggering 50 percent in 2013 and the breakup rate among unmarried long-term couples even higher, it appears that the more we tweet, the more disconnected we become. So many of us believe that new is better, hotter, and more intense, but love at first sight isn't really love, it's chemistry. Developing the connections and intimacy that everyone craves takes time and skill. In *Partners in Passion*, Michaels and Johnson provide readers with a fun, step-by-step guide to discovering

true, loving, and romantically sexual relationships that will last for decades. Comprehensive and inclusive, *Partners in Passion* is original and provocative, drawing on a variety of sources: cutting-edge science, psychology, the authors' background in tantra, and personal experiences as teachers and as a couple. *Partners in Passion* invites couples to design their relationships and to choose consciously, and is replete with how-to suggestions and exercises, including interviews with couples from diverse backgrounds, relationship styles, and orientations who are enjoying erotically vibrant partnerships.

The Great Partnership Aug 01 2022

Impassioned, erudite, thoroughly researched, and beautifully reasoned, *The Great Partnership* argues not only that science and religion are compatible, but that they complement each other—and that the world needs both. “Atheism deserves better than the new atheists,” states Rabbi Jonathan Sacks, “whose methodology consists of criticizing religion without understanding it, quoting texts without contexts, taking exceptions as the rule, confusing folk belief with reflective theology, abusing, ridiculing, and demonizing religious faith and holding it responsible for the great crimes against humanity. Religion has done harm; I acknowledge that. But the cure for bad religion is good religion, not no religion, just as the cure for bad science is good science, not the abandonment of science.” Rabbi Sacks’s counterargument is that religion and science are the two essential perspectives that allow us to

see the universe in its three-dimensional depth. Science teaches us where we come from. Religion explains to us why we are here. Science is the search for explanation. Religion is the search for meaning. There have been times when religion tried to dominate science. And there have been times, including our own, when it is believed that we can learn all we need to know about meaning and relationships through biochemistry, neuroscience, and evolutionary psychology. In this fascinating look at the interdependence of religion and science, Rabbi Sacks explains why both views are tragically wrong. ***National Jewish Book Awards 2012, Finalist*** Dorot Foundation Award for Modern Jewish Thought and Experience *Partnering* May 30 2022 An inspirational call to build deep business and personal relationships as the foundation of a meaningful life and purposeful collaborations, drawing from the wisdom of legendary partnerships including Jimmy and Rosalynn Carter, Ben and Jerry,

The Role of Social Partners in Managing Europe's Great Recession Dec 25 2021

This comprehensive study of the Great Recession and its consequences provides comparative analyses of the extent to which social concertation between government, unions, and employers varied over time and across European countries. This edited volume - a collaboration of international country experts - includes eight in-depth country case studies and analysis of European-level social dialogue. Further comparisons explore whether social concertation followed economic necessity, was dependent on political factors, or rather resulted from labour's power resources. The importance of social partners' involvement is again evident during

the Covid-19 pandemic. Examining contemporary crises, the book will be of considerable interest to scholars and students of public and social policies, comparative political economy, and industrial relations - and more broadly to those following European and EU politics.

Guidebook on Promoting Good Governance in Public-private Partnerships Feb 01 2020 This guidebook offers training modules for the promotion of public-private partnerships in the

delivery of public services. PPPs in theory are supposed to combine the best of both worlds. The private sector with its resources, management skills and technology; and the public sector with its regulatory actions and protection of the public interest provide a balance in delivering public service. PPPs though are also complex in nature, requiring different types of skills and new enabling institutions and they lead to changes in the status of public sector jobs. To work well, they require "good governance", that is, well-functioning institutions, transparent, efficient procedures and accountable and competent public and private sectors. This guidebook therefore seeks to elaborate best practice and is aimed at policymakers, government officials and the private sector.

Co-Leaders Oct 23 2021 "Co-leadership...is a tough-minded strategy that will unleash the hidden talent in any enterprise. Above all, co-leadership is inclusive, not exclusive. It celebrates those who do the real work, not just a few charismatic often isolated leaders who are regally compensated for articulating the organization's vision." -David A. Heenan and Warren Bennis Today's heads of big companies are as recognizable to us as the most popular entertainers or sports stars, but the heart and soul of every organization are those leaders below the CEO. Today's celebrity CEO has become either a figure head or an egomaniac, and often too public a personality to get the real work done. That work is done instead by teams of leaders-exceptional deputies who forge great partnerships to maximize both organizational and personal success. Heenan and Bennis believe we must look beyond the Bill Gateses of the world to understand what makes an organization excel. Written for CEOs, managers,

and anyone else interested in modern organizations, this is the first comprehensive study of co-leaders and their often quiet power. Exhaustively researched and illustrated with memorable anecdotes and lively stories, Co-Leaders examines a dozen great partners such as Steve Ballmer of Microsoft, Bob Lutz of Chrysler, Bill Guthridge, coach of the University of North Carolina basketball team, and Anne Sullivan Macy, Helen Keller's teacher. The changing nature of corporate leadership has seen the emergence of a new Silicon Valley model of success, where boss and subordinate seem more like peers with the spotlight on great partnerships. Talent, not title, is the source of power at a growing number of hot high-tech companies. In these collegial, non-hierarchical organizations, today's deputy can become tomorrow's CEO simply by taking his or her breakthrough idea and walking out the door. Good ideas belong, initially at least, to the people who have them, not to the company and

not to the boss which is why this new egalitarianism isn't just a matter of style-it's a question of survival. Co-leaders know both the executive and subordinate experience, making them better adapted to the needs of the new millennium where men and women who can command and follow will prove to be the greatest assets of any organization. Co-Leaders is intended for everyone who aspires to make his or her organization great. By showing the enterprise through the eyes of inspired deputies, this book reveals how both organizations and individuals can benefit from a more inclusive, less celebrity-oriented definition of leadership. This groundbreaking book argues for a new paradigm: gifted leaders and their talented co-leaders working together to make their organizations stronger, more nimble, more equitable...and ultimately more successful. The Fourth Industrial Revolution Oct 11 2020
World-renowned economist Klaus Schwab,
Founder and Executive Chairman of the World
Economic Forum, explains that we have an

opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or

implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

The Great Partnership Oct 03 2022 Why were
Generals Lee and Jackson so successful in their
partner- ship in trying to win the war for the
South? What was it about their styles,
friendship, even their faith, that cemented them
together into a fighting machine that
consistently won despite often overwhelming
odds against them?The Great Partnership has
the power to change how we think about
Confederate strategic decision-making and the
value of personal relationships among senior

leaders responsible for organizational survival.
Those relationships in the Confederate high
command were particularly critical for victory,
especially the one that existed between the two
great Army of Northern Virginia generals.It has
been over two decades since any author
attempted a joint study of the two generals. At
the very least, the book will inspire a very lively
debate among the thousands of students of Civil
War his- tory. At best, it will significantly revise
how we evaluate Confederate strategy during
the height the war and our understanding of
why, in the end, the South lost.
