Some Necessary Questions of the Play Nov 09 2020 This study of Hamlet begins with an examination of the play's use of real space and time as elements of a narration that is, in part, about a protagonist's perception of space and time. Robert E. Wood shows that distortions in Hamlet's perceptions of space and time accompany his disillusionment with cultural values. In the next phase of the book, Wood examines how wit and soliloquy are used in the protagonist's interrogation of language. In the third phase of the book, Wood examines expectations we bring to the theater: our focus on the body as the locus of our attention; and our understanding of the generic framework which orders our experience. Wood finds in Hamlet a series of violations of generic expectation that opens up the narrow range of revenge tragedy to the fuller scope of tragedy proper. Because Hamlet problematizes genre, we become aware of the problems generated when mythic narrative is infused with self-conscious dramatic characters. The resulting ambivalence of the generic framework makes possible the play's generalized challenge to institutions of social order.

Perfect Questions, Perfect Answers Mar 14 2021 In 1972, Bob Cohen, an American science teacher serving in the Peace Corps, found himself halfway around the world, in the holy village of Mayapur, West Bengal, on a search for spiritual enlightenment. There, in a small bamboo hut, he found a teacher able to answer his questions. Perfect Questions, Perfect Answers is the record of his transformative talks with Srila Prabhupada.

The Questions of Tenure Feb 10 2021 Tenure is the abortion issue of the academy, igniting arguments and inflaming near-religious passions. To some, tenure is essential to academic freedom and a magnet to recruit and retain top-flight faculty. To others, it is an impediment to professorial accountability and a constraint on institutional flexibility and finances. But beyond anecdote and opinion, what do we really know about how tenure works? In this unique book, Richard Chait and his colleagues offer the results of their research on key empirical questions. Are there circumstances under which faculty might voluntarily relinquish tenure? When might new faculty actually prefer non-tenure track positions? Does the absence of tenure mean the absence of shared governance? Why have some colleges abandoned tenure while others have adopted it? Answers to these and other questions come from careful studies of institutions that mirror the American academy: research universities and liberal arts colleges, including both highly selective and less prestigious schools. Lucid and straightforward, *The Questions of Tenure* offers vivid pictures of academic subcultures. Chait and his colleagues conclude that context counts so much that no single tenure system exists. Still, since no academic reward carries the cachet of tenure, few institutions will initiate significant changes without either powerful external pressures or persistent demands from new or disgruntled faculty.

Advocating Heightened Education Jun 04 2020 Colleges and universities face unprecedented pressure to streamline and reduce their infrastructure. A new generation of reformers, frustrated by bureaucratic obstacles and rising costs, dream of education without schools. Those reforms, if realized, promise to render education indistinguishable from other social spheres. *Advocating Heightened Education* mobilizes situated theories of learning to advocate the labor and expense that goes into maintaining campuses. Higher education's bulky and incommensurable institutions—from the community colleges and Ivy Leagues to the regional public universities and small liberal arts campuses—serve a critical modality. They ensure that educational forms remain visible and available for critique. Their diversity of form retains the possibility of divergent and transformative educational futures. This ethnographic and archival study of two alternative campuses, The Evergreen State College and California

State University, Monterey Bay, illustrates how educators advocate their work by heightening its visibility and by modeling appreciation for situated teaching and inquiry. It provides examples of those advocacy techniques with stories of professional life and close readings of historical documents that include institutional and legislative reports, facilities memoranda, and course descriptions. These materials offer a vibrant counter-narrative to reform movements that seek to standardize the college experience. Scholars of higher education, pedagogy, and communication will find this book particularly interesting.

The Englishwoman's Review of Social and Industrial Questions Feb 22 2022 *The Englishwoman's Review*, which published from 1866 to 1910, participated in and recorded a great change in the range of possibilities open to women. The ideal of the magazine was the idea of the emerging emancipated middle-class woman: economic independence from men, choice of occupation, participation in the male enterprises of commerce and government, access to higher education, admittance to the male professions, particularly medicine, and, of course, the power of suffrage equal to that of men. First published in 1985, this thirty-ninth volume contains issues from 1907 to 1908. With an informative introduction by Janet Horowitz Murray and Myra Stark, and an index compiled by Anna Clark, this set is an invaluable resource to those studying nineteenth and early twentieth-century feminism and the women's movement in Britain.

111 Questions and Answers in Packaging Technology Aug 19 2021 *111 Questions and Answers in Packaging Technology* is a practical educational reference and detailed study guide for those aspiring to become packaging professionals through formal and informal training. Sola Somade and Tunji Adegboye together possess over thirty years of experience in handling packaging matters at both Unilever and Cadbury Nigeria Plc and offer not only their hands-on experience as packaging developers, quality managers, and buyers, but also share questions from former papers and lecture notes from the Institute of Packaging. Students from all over the world who want to learn how to write professional packaging examinations will benefit from the information included as they prepare for the various stages of their examinations. Seasoned practitioners will receive tips on how to demystify key areas of packaging that cause anxiety, helpful suggestions on solving basic calculations and developing unique formats with language easily understood by clients and other stakeholders, and effective ways to make sound economic decisions on packaging material choice. Other issues relevant to each of the major packaging materials known to modern civilization are also covered. Packaging is a universal subject that affects social and economic life in many ways. *111 Questions and Answers* provides valuable insight into a unique industry.

"Nagging" Questions Apr 14 2021 In this anthology of new and classic articles, fifteen noted feminist philosophers explore contemporary ethical issues that uniquely affect the lives of women. These issues in applied ethics include autonomy, responsibility, sexual harassment, women in the military, new technologies for reproduction, surrogate motherhood, pornography, abortion, nonfeminist women and others. Whether generated by old social standards or intensified by recent technology, these dilemmas all pose persistent, 'nagging,' questions that cry out for answers. Unlike other anthologies in feminist ethics, this book encourages critical thinking about concrete, contemporary social and moral issues. Each engaging, clearly written article is followed by discussion questions, making the book useful for students of women's studies, philosophy, sociology, and political science
