RX Dec 21 2021 From cartoonist Rachel Lindsay, comes a graphic memoir about the treatment of mental illness, treating mental illness as a commodity, and the often unavoidable choice between sanity and happiness. In her early twenties in New York City, diagnosed with bipolar disorder, Rachel Lindsay takes a job in advertising in order to secure healthcare coverage for her treatment. But work takes a strange turn when she is promoted onto the Pfizer account and suddenly finds herself on the other side of the curtain, developing ads for an antidepressant drug. She is the audience of the work she's been pouring over and it highlights just how unhappy and trapped she feels, stuck in an endless cycle of treatment, insurance and medication. Overwhelmed by the stress of her professional life and the self-scrutiny it inspires, she begins to destabilize and while in the midst of a crushing job search, her mania takes hold. Her altered mindset yields a simple solution: to quit her job and pursue life as an artist, an identity she had abandoned in exchange for medical treatment. When her parents intervene, she finds herself hospitalized against her will, and stripped of the control she felt she had finally reclaimed. Over the course of her two weeks in the ward, she struggles in the midst of doctors, nurses, patients and endless rules to find a path out of the hospital and this cycle of treatment. Nature Rx Jan 10 2021 The Nature Rx movement is changing campus life. Offering alternative ways to deal with the stress that students are under, these programs are redefining how to provide students with the best possible environment in which to be healthy, productive members of the academic community. In *Nature Rx*, Donald A. Rakow and Gregory T. Eells summarize the value of nature prescription programs designed to encourage college students to spend time in nature and to develop a greater appreciation for the natural world. Because these programs are relatively new, there are many lessons for practitioners to learn; but clinical studies demonstrate that students who regularly spend time in nature have reduced stress and anxiety levels and improved mood and outlook. In addition to the latest research, the authors present a step-by-step formula for constructing, sustaining, and evaluating Nature Rx programs, and they profile four such programs at American colleges. The practical guidance in *Nature Rx* alongside the authors' vigorous argument for the benefits of these programs for both students and institutions places Rakow and Eells at the forefront of this burgeoning movement.

Generation Rx Aug 17 2021 What had happened to my baby brother? How did a tiny little pill shatter our family? When did we first begin losing Pat? These are the harrowing questions that plagued Erin Marie Daly after her youngest brother Pat, an OxyContin addict, was found dead of a heroin overdose at the age of twenty. In just a few short years, the powerful prescription painkiller had transformed him from a fun-loving ball of energy to a heroin addict hell-bent on getting his next fix. Yet even as Pat's addiction destroyed his external life, his internal struggle with opiates was far more heart-wrenching. Erin set out on a painful personal journey, turning a journalistic eye on her brother's addiction; in the process, she was startled to discover a new twist to the ongoing prescription drug epidemic. That kids are hooked on prescription drugs is nothing new what is new is the rising number of young heroin addicts whose addiction began with pills in suburban bedrooms, and how a generation of young people playing around with today's increasingly powerful opioids are finding themselves in the frightening grip of heroin. While many books have tackled the topic of Big Pharma, drug addiction, and our increasingly over-medicated society, Generation Rx offers an entirely new look at what the prescription pill epidemic means for today's youth and the world around them.

So, if you're suffering from GI issues, fatigue, out-of-whack-hormones, mood and cognition difficulties, elevated cholesterol, blood sugar control problems, or an autoimmune problem, *Fast Metabolism Food Rx* has the solution for you. With targeted eating plans, you can feed your body back to a vibrant, energetic, and thriving state.

God's Rx Dec 29 2019 *God's Rx-Alphabet Soup* is the result of using a tool that we all are familiar with—the alphabet. Bedtime for the author had become a stressful time due to several events—recent widowhood, loneliness and financial loss. Widows suddenly have more time. When she finally asked God for help, she felt led to start thinking of Biblical words that described God—Abba, All Sufficient, the Amen, Ancient of Days, Banner, Blessing, Branch, Bread of Life, Counselor, Creator...Eventually six alphabets emerged. They were very effective in helping her focus on the Lord, resulting in better sleep and a sense of peace and thankfulness; and so she shares this tool contributing several of the alphabets she developed over the last seven years. Nancy Adels obtained her BS in Nursing from Columbia University, NYC, N.Y. in 1962, and her Masters of Nursing from the University of Colorado, Denver, Colorado in 1965. She married her husband, Henry, the same weekend she received her MSN. Henry would proudly say that his wife earned two masters in one weekend. Through the years the author taught nursing and patient care to student nurses and home health aides. She retired to care for her husband. He died one week before their 45th anniversary. She lives in the Philadelphia suburbs, Jersey side, and attends Fellowship Bible Church, Deptford, New Jersey.

China Rx Apr 24 2022 Millions of Americans are taking prescription drugs made in China and don't know it-- and pharmaceutical companies are not eager to tell them. This probing book examines the implications for the quality and availability of vital medicines for consumers. Several decades ago, penicillin, vitamin C, and many other prescription and over-the-counter products were manufactured in the United States. But with the rise of globalization, antibiotics, antidepressants, birth control pills, blood pressure medicines, cancer drugs, among many others are made in China and sold in the United States. China's biggest impact on the US drug supply is making essential ingredients for thousands of medicines found in American homes and used in hospital intensive care units and operating rooms. The authors convincingly argue that there are at least two major problems with this scenario. First, it is inherently risky for the United States to become dependent on any one country as a source for vital medicines, especially given the uncertainties of geopolitics. For example, if an altercation in the South China Sea causes military personnel to be wounded, doctors may rely upon medicines with essential ingredients made by the adversary. Second, lapses in safety standards and quality control in Chinese manufacturing are a risk. Citing the concerns of FDA officials and insiders within the pharmaceutical industry, the authors document incidents of illness and death caused by contaminated medications that prompted reform. This is a disturbing, well-researched book and a wake-up call for improving the current system of drug supply and manufacturing.
